Identification of the main execution venues and the quality of execution of BBVA clients orders

2020

Content

1. Introduction	4
2. Identification of the top five execution venues and brokers in terms of trading volume for all executed client orders per class of financial instrument	5
2.1. Retail clients	5
2.1.1. Execution.....	5
2.1.2. Transmission.....	8
2.2. Professional clients	11
2.2.1. Execution.....	11
2.2.2. Transmission.....	14
3. Summary of the analysis and conclusions of BBVA related to the quality of execution obtained on the execution venues where they executed all client orders in 2020	18
3.1. Explanation of the relative importance that BBVA confers to the execution factors of prices, costs, speed, likelihood of execution or any other consideration including qualitative factors when assessing the quality of execution.	18
3.2. Description of the possible close links, conflicts of interest and common ownerships that BBVA may have with any execution venues used to execute orders.	19
3.3. Description of the specific arrangements between BBVA and the execution venues regarding payments made or received discounts, rebates or non-monetary benefits received.	19
3.4. Explanation of the factors that led to a change in the list of execution venues in our execution policy, if such a change occurred.....	20
3.5. Explanation of how BBVA order execution differs according to client categorisation, where BBVA treat categories of clients differently and where it may affect our order execution arrangements.	20
3.6. Explanation of whether we have given other criteria precedence over immediate price and cost when executing retail client orders and how these other criteria were instrumental in delivering the best possible result in terms of the total consideration to the client.....	20

3.7. Explanation of how the investment firm has used any data or tools relating to the quality of execution, including any data published under Commission Delegated Regulation (EU) 2017/575 of 8 June 2016 [RTS 27].	21
3.8. Explanation of how the investment firm has used output of a consolidated tape provider established under Article 65 of Directive 2014/65/EU.	21

1. Introduction

In order to comply with the client protection objectives and transparency demanded by the stock market regulatory legislation, the European Commission has adopted, amongst others, the Delegated Regulation (EU) 2017/576 of 8 June 2016 (“Delegated Regulation”) supplementing Directive 2014/65/EU of the European Parliament and of the Council. It establishes that the investment firms that provide investment services will publish the identity of the top five execution venues, in terms of trading volume, where the clients’ trades have been executed. This is dependent on the type of client and the financial instrument, as well as information about the quality of the execution.

This document includes the information required by the Delegated Regulation related to those types of instruments on which BBVA (“BBVA” or the “Entity”) executes their clients’ orders, so it will not include other types of instruments in which BBVA does not provide those type of services.

BBVA does not have enough detail to provide the information requested by the Delegated Regulation, such as the percentage of passive orders, aggressive or directed orders for 2020 in some cases.

This document will be published in a machine-readable electronic format, which could be downloaded by the public during the next two years on the BBVA website (<http://www.bbvacib.com>).

2. Identification of the top five execution venues and brokers in terms of trading volume for all executed client orders per class of financial instrument

Below is an identification of the top five execution venues in terms of trading where the clients' orders have been executed by BBVA during 2020, broken down by the client categorisation and the category of the financial instrument.

2.1. Retail clients

2.1.1. Execution

a) Equities – Shares and depository receipts

i. Ticket size liquidity band 5 and 6 (from 2000 trades per day)

Client type	Interaction	Class of instrument	Period start	Period end	Notification if <1 average trade per business day in the previous year
Retail	Execution	Equities - Shares & Depository Receipts (T5/6)	01/01/2020	31/12/2020	N
Top five investment firms ranked in terms of trading volumes (descending order)	Proportion of volume traded as a percentage of total in that class	Proportion of orders executed as percentage of total in that class	Percentage of passive orders	Percentage of aggressive orders	Percentage of directed orders
Equiduct MTF Hybrid XEQT	46.99	48.52	0	0.05	0
Bolsa de Madrid XMAD	30.35	29.87	3.57	1.8	0
Bolsa de Valores de Bilbao XBIL	19.87	18.84	0	0	0
Bolsa de Barcelona XBAR	1.27	1.71	0	0	0
Bolsa de Valencia XVAL	1.15	0.97	0	0	0

ii. Ticket size liquidity band 3 and 4 (80-1999 trades per day)

Client type	Interaction	Class of instrument	Period start	Period end	Notification if <1 average trade per business day in the previous year
Retail	Execution	Equities - Shares & Depository Receipts (T3/4)	01/01/2020	31/12/2020	N
Top five investment firms ranked in terms of trading volumes (descending order)	Proportion of volume traded as a percentage of total in that class	Proportion of orders executed as percentage of total in that class	Percentage of passive orders	Percentage of aggressive orders	Percentage of directed orders
Bolsa de Madrid XMAD	74.75	79.05	1.36	1	0

3. Summary of the analysis and conclusions of BBVA related to the quality of execution obtained on the execution venues where they executed all client orders in 2020

In the following section, a list of the criteria used by BBVA to evaluate the quality of the execution obtained at the execution venues where the trades have been executed during 2020, in order to facilitate a clear vision of the execution tools and strategies.

3.1. Explanation of the relative importance that BBVA confers to the execution factors of prices, costs, speed, likelihood of execution or any other consideration including qualitative factors when assessing the quality of execution.

As established in the BBVA Best Execution Policy (whose summary can be found on <http://www.bbvacib.com>), in order to obtain the best possible result for Clients, the following factors will be taken into account:

- Instrument price;
- costs (including, amongst others, execution and clearing / settlement costs);
- Liquidity of the Instrument (i.e., the volume available at each Execution Venue for the relevant Instrument and market depth);
- size of the order (number of Instruments included in the order);
- likelihood of execution and settlement;
- speed of execution (ability to execute transactions promptly);
- settlement characteristics;
- any other relevant consideration or characteristic for the execution of the order.

The following issues will also be taken into account in the determination of the relative importance of the aforementioned factors: the characteristics of the Client (including categorisation as a Retail or Professional Client), the characteristics of the order, the characteristics of the Instrument and the characteristics of the Execution Venue to which said order may be directed.

The best possible result in the execution of Retail Client orders will be determined in terms of total consideration, considering the price of the Instrument and the costs related to execution. Said costs shall include all expenses passed on to the Client that are directly related to the execution of the order.

When the best total consideration for the Retail Client can be obtained from more than one Execution Venue, the following issues will also be taken into account in the following order: the probability of execution, the liquidity of the instrument and, last place, proportionally the rest of execution factors will also be taken into account together with any other pertinent consideration or characteristic for the execution of the order.

The best possible result in the execution of the orders of Professional Clients will be determined, in this order, in terms of the price of the instrument, the instrument's liquidity, volume, probability of execution and settlement, costs (including, among others, the costs, fees or expenses of execution and clearing / settlement), any other relevant considerations for the execution of the order.

3.2. Description of the possible close links, conflicts of interest and common ownerships that BBVA may have with any execution venues used to execute orders.

BBVA has a 50% ownership in Altura. During 2020, there were no other close links conflicts of interests, or common ownerships related to any other external execution venues or brokers used to execute client orders.

3.3. Description of the specific arrangements between BBVA and the execution venues regarding payments made or received discounts, rebates or non-monetary benefits received.

BBVA does not have any specific arrangements with any external execution venues or brokers used to execute client orders relating to payments made or received, discounts, rebates or non-monetary benefits received. Execution fees to external venues follow official pricing schemes.

3.4. Explanation of the factors that led to a change in the list of execution venues in our execution policy, if such a change occurred.

8 Execution Venues for orders regarding transferable securities (Shares, Certificates and similar instruments) have been excluded when BBVA is transmitting clients orders to intermediaries reflecting some institutional business decommission. Additionally, there are two new Execution Venues added as a result of the aforementioned business decommission.

20 Execution Venues for orders involving Derivatives Instruments (Options, Futures and Swaps ToTV) have been included when BBVA is executing clients orders with the aim of reflecting all the potential venues use when dealing with those instruments.

3.5. Explanation of how BBVA order execution differs according to client categorisation, where BBVA treat categories of clients differently and where it may affect our order execution arrangements.

In general terms, the main markets offer better prices and transactional costs, so the retail orders are mainly executed in those venues - the total consideration is the only factor that must be taken into account.

For professional clients, other factors including probability of execution, liquidity or any other specific requests made by the clients will be taken into consideration. In those cases it may be necessary for the execution to be undertaken on a different market in order to obtain the best execution for this client type.

3.6. Explanation of whether we have given other criteria precedence over immediate price and cost when executing retail client orders and how these other criteria were instrumental in delivering the best possible result in terms of the total consideration to the client.

The best possible result for the execution of retail client orders will be determined in terms of total consideration. When the best total consideration for the retail client can be obtained from more than one Execution Venue, the following issues will also be taken into account: the probability of execution, the liquidity of the instrument and, any remaining execution factors will also be factored in.

3.7. Explanation of how the investment firm has used any data or tools relating to the quality of execution, including any data published under Commission Delegated Regulation (EU) 2017/575 of 8 June 2016 [RTS 27].

Using automatic monitoring tools, BBVA ensures the quality of execution provided by the execution venues and brokers used to execute client orders.

3.8. Explanation of how the investment firm has used output of a consolidated tape provider established under Article 65 of Directive 2014/65/EU.

No information has been used from providers of consolidated tape.
