Key Information Document

Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

Product

Product name	Credit Linked Note Linked to Markit CDX North America High Yield S47 Index
Product identifier	ISIN: XS3533120732
Name of PRIIP manufacturer	Banco Bilbao Vizcaya Argentaria, S.A. ("BBVA"), acts as the manufacturer, while BBVA Global Markets B.V. is the issuer of the Product (the "Issuer") and assumes all the payment obligations towards the Client.
Contact Data	Web: www.bbva.es
For more information call	+34 900 108 637
Competent Authority	Comisión Nacional del Mercado de Valores (CNMV) is responsible for supervising BBVA and Autoriteit Financiële Markten (AFM) is responsible for supervising BBVA Global Markets B.V. in relation to this Key Information Document.
Date of production of the KID	30/10/2026

You are about to purchase a product that is not simple and may be difficult to understand.

1. What is this product?

Type

English law governed credit-linked notes / Return depends on the performance of the reference entities / No capital protection against market risk

Term

The product has a fixed term and will be due on 9 January 2032, subject to the occurrence of a credit event.

Objectives

(Terms that appear in **bold** in this section are described in more detail in the table(s) below.)

The product is designed to provide a return in the form of (1) regular interest payments and (2) a cash payment on termination of the product. However, whether interest is payable and the timing and amount of any cash payment upon termination will depend on whether or not one or more credit events are determined to have occurred during the **credit observation period**. Your initial investment is not protected. You may not make any profit and you may lose some or all of your initial investment.

Interest:

1. If the **proportion of the reference index impacted by the credit events** is less than 20.00%, on each **interest payment date** you will receive an interest payment calculated by multiplying the **product notional amount** by the interest rate of 7.00% per annum (indicative; the final rate will be determined on or around the Trade Date and will not be less than 5.50% per annum) and then applying the relevant **day count fraction** to adjust this amount to reflect the length of the relevant **interest period**.

Interest payment dates
9 July 2027
11 October 2027
10 January 2028
10 April 2028
10 July 2028
9 October 2028
9 January 2029
9 April 2029
9 July 2029
9 October 2029
9 January 2030
9 April 2030
9 July 2030
9 October 2030
9 January 2031
9 April 2031
9 July 2031
9 October 2031
Maturity date

2. If the **proportion of the reference index impacted by the credit events** is higher or equal to 20.00% but less than 30.00%, on each **interest payment date**, you will receive the interest described above adjusted based on the **proportion of reference index impacted by the credit events** during the elapsed **credit observation period**. The interest to be paid reduces every time the **proportion of the reference index impacted by the credit events** increases. In that case, the interest payment will equal to (A) the interest payment described above minus (B) (i) that amount multiplied by (ii) the difference between (x) the **proportion of the reference index impacted by the credit events** and (y) 20.00% (the **tranche** starting point) divided by (iii) 10.00% (the **tranche** range).
3. If the **proportion of the reference index impacted by the credit events** is higher or equal to 30.00%, no further interest payments will be made following the **interest payment date** immediately preceding the **credit determination date**.

Principal redemption:

1. If the **proportion of the reference index impacted by the credit events** is less than 20.00%, on the **maturity date** you will receive a cash payment equal to SEK 10,000.00.
2. If the **proportion of the reference index impacted by the credit events** is higher or equal to 20.00% but less than 30.00%, on the **maturity date** you will receive (A) SEK 10,000.00 minus (B) (i) SEK 10,000.00 multiplied by (ii) the difference between (x) the **proportion of reference index impacted by the credit events** and (y) 20.00% (the **tranche** starting point) divided by (iii) 10.00% (the **tranche** range)
3. If the **proportion of the reference index impacted by the credit events** is higher or equal to 30.00%, on the **maturity date** you will receive no repayment of your principal amount.

Credit event: A **reference entity** experiences a credit event if one of the events listed below occurs. A **CDDC**, or the **product calculation agent**, will determine whether one of these events has occurred.

1. Bankruptcy: the **reference entity** experiences insolvency, bankruptcy or related events.
2. Failure to Pay: the **reference entity** fails to make payments due on its debt above a prescribed threshold.

DocID: 21676434 / 70d116cf-50e7-4da0-acd0-de83d968dd4a

Under the product terms, certain dates specified above and below will be adjusted if the respective date is either not a business day or not a trading day (as applicable). Any adjustments may affect the return, if any, you receive.
In addition to the consequences that result from the occurrence of a credit event, the product terms also provide that if certain other exceptional events occur (1) adjustments may be made to the product, (2) certain fallback provisions may apply and/or (3) the issuer may terminate the product early fully or in part. These events are specified in the product terms and principally relate to the **reference entity**, the product and the issuer. The return (if any) you receive on an early redemption following the occurrence of an exceptional event will be different and is likely to be less than the amount you invested.
When purchasing this product during its lifetime, the purchase price may include accrued interest on a pro rata basis.

Reference entities	The 100 constituents of the **reference index**	**Product calculation agent**	Banco Bilbao Vizcaya Argentaria, S.A.
Reference index	Markit CDX North America High Yield S47 Index	**Issue date**	15 January 2027
Reference entity transaction type	Standard North American Corporate	**Maturity date / term**	9 January 2032
Credit weighting	For each **reference entity**: 1 divided by the number of **reference entities**	**Credit observation period start date**	30 December 2026
Product notional amount	SEK 10,000	**Trade date**	29 December 2026
Issue price	94.25% of the **product notional amount**	**Credit observation period end date**	20 December 2031
Product currency	Swedish Krona (SEK)	**Credit observation period**	The period commencing (and including) on the **Credit observation period start date** and ending on (and including) the **Credit observation period end date**
Subscription period	9 November 2026 (inclusive) to 18 December 2026 (inclusive)	**Credit determination date**	Either the date on which the **CDDC** is asked to determine whether the relevant credit event has occurred or, the date on which the **product calculation agent** (or other relevant transaction party) gives notice that a credit event has occurred
Tranche	The **proportion of the reference index impacted by the credit events** reducing the principal redemption and interest, starting at 20.00% and ending at 30.00%	**Interest period**	Each period from, and including, an **interest payment date** (or the **issue date**, in the case of the initial **interest period**) to, but excluding, the next **interest payment date** (or the **maturity date**, in the case of the final **interest period**)
Proportion of the reference index impacted by the credit events	The sum of the **credit weighting** for each reference entity that suffered a credit event	**Day count fraction**	30/360
CDDC	A Credit Derivatives Determinations Committee established under the relevant Determination Committee Rules		

Intended retail investor

The product is intended to be offered to retail investors who fulfil all of the criteria below:

1. they have the ability to make an informed investment decision through sufficient knowledge and understanding of the product and its specific risks and rewards, either independently or through professional advice, and they may have experience of investing in and/or holding a number of similar products providing a similar market exposure;
2. they seek income and/or expect the reference entities to perform in a way that generates a positive return. They have a medium investment horizon;
3. they are able to bear a total loss of their initial investment, consistent with the redemption profile of the product at maturity (market risk);
4. they accept the risk that the issuer could fail to pay or perform its obligations under the product irrespective of the redemption profile of the product (credit risk);
5. they are willing to accept a level of risk of 6 out of 7 to achieve potential returns, which reflects the second highest risk (as shown in the summary risk indicator below which takes into account both market risk and credit risk).

2. What are the risks and what could I get in return?

Risk indicator

Lower risk **Higher risk**

The risk indicator assumes you keep the product until 9 January 2032. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.
We have classified this product as 6 out of 7, which is the second-highest risk class. This rates the potential losses from future performance at a high level, and poor market conditions are very unlikely to impact our capacity to pay you.
To the extent the currency of the country in which you purchase this product or your account currency differs from the product currency, please be aware of currency risk. You will receive payments in a different currency so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.
If we are not able to pay you what is owed, you could lose your entire investment.

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.
The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

Recommended holding period:	**5 years**		
Example investment:	SEK 100,000		
Scenarios		***If you exit after 1 year***	***If you exit after 5 years***

DocID: 21676434 / 70d116cf-50e7-4da0-acd0-de83d968dd4a

			(Recommended holding period)
Minimum	**There is no minimum guaranteed return. You could lose some or all of your investment.**		
Stress	**What you might get back after costs** Average return each year	SEK 634 -99.35%	SEK 8,442 -39.11%
Unfavourable	**What you might get back after costs** Average return each year	SEK 92,848 -7.11%	SEK 25,500 -23.98%
Moderate	**What you might get back after costs** Average return each year	SEK 99,479 -0.52%	SEK 143,112 7.46%
Favourable	**What you might get back after costs** Average return each year	SEK 104,298 4.27%	SEK 143,112 7.46%

The stress scenario shows what you might get back in extreme market circumstances. The favorable, moderate and unfavorable scenarios have been calculated using 10,000 simulations based on the underlying asset's past performance and represent the 90th, 50th and 10th percentile outcomes, respectively.
The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. Payments made to a client during the life of a product requires BBVA to make certain assumptions. This is for the purpose of undertaking scenario analysis and the calculation of product profitability as shown in the table. BBVA has decided not to capitalize these payments.

3. What happens if BBVA Global Markets B.V. is unable to pay out?

Banco Bilbao Vizcaya Argentaria, S.A. guarantees the payment obligations that the Issuer assumes in the Product, in its same terms. The Product is not covered by the Credit Institutions Deposit Guarantee Scheme or any other guarantee scheme. In the event that BBVA as guarantor could not pay, you would face a financial loss. In the event of the resolution of the Guarantor of such financial instrument (applicable process when the Guarantor is insolvent or it is expected that it will become insolvent in the near future and due to public interest and financial stability it is necessary to avoid its insolvency), such product could be converted into shares or its Nominal Amount and, as a result, you could incur losses on your investment.

4. What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.
We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- SEK 100,000 is invested

	If you exit after 1 year	*If you exit after 5 years*
Total costs	SEK 9,793	SEK 6,610
Annual cost impact*	10.4%	1.5% each year

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 8.9% before costs and 7.5% after costs.
We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

Composition of costs

One-off costs upon entry or exit		**If you exit after 1 year**
Entry costs	6.6% of the amount you pay when entering this investment. These costs are already included in the price you pay.	SEK 6,610
Exit costs	This product does not incur any exit fees if held until maturity. The exit fee in case of an early exit is defined in the section "How long should I hold it and can I take money out early?"	SEK 3,183
Ongoing costs taken each year		
Management fees and other administrative or operating costs	0.0% of your investment amount per year. This is an estimate of the actual costs.	SEK 0
Transaction costs	0.0% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	SEK 0

5. How long should I hold it and can I take money out early?

Recommended holding period: 5 years

This Product will mature on 9 January 2032. This Product doesn't allow the Client to cancel their investment before 9 January 2032. However, under normal market conditions, BBVA may facilitate to the Client the price at which BBVA is able to buy the Product. Such a price will be calculated subtracting (i) from the fair value of the Product calculated by BBVA in accordance to the market variables and methodologies commonly used in market (ii) an estimated cost of 3.2% over the Nominal Amount. This anticipated sale may generate a financial loss to the Client.

6. How can I complain?

Customer Service. P.O. Box 1598. 28080 Madrid. e-mail: reclamacionesSAC@bbva.com. Telephone: +34 900 812 679. Web: www.bbva.es. For claims related to the sale or advice of this Product by an entity other than BBVA, please contact the entity which sold you or advised you about the Product.

7. Other relevant information

For further information about the functioning and risks of this Product, contact the entity which advises you or which is going to sell the Product to you. Prospectus registered with the Central Bank of Ireland. The Product will be issued under the most recent version of the Prospectus of the Issuer, which is available on the website of BBVA (https://shareholdersandinvestors.bbva.com/debt-investors/programas/structured-medium-term-note/). The Client should also check the issue terms of the Product. According to the Prospectus, the Product is governed by English law and the Client submits to the jurisdiction of the English courts.
