5. Performance of Shares, Explanation of Effect on Value of Investment and Other Information concerning the Underlying

The past and future performance, the volatility and background information about each Reference Item can be obtained from the corresponding Bloomberg Screen Page as set out in paragraph 40(i) above.

For a description of any adjustments and disruption events that may affect a Reference Item and any adjustment rules in relation to events concerning a Reference Item (if applicable) please see Annex 3 (Additional Terms and Conditions for Equity Linked Notes) in the Issuer's Base Prospectus.

The value of the Notes is affected by the performance of the worst-performing Share in the Basket. If, on 11 June 2027 or 13 September 2027, the Issuer decides to early redeem the Notes, the Notes will be automatically redeemed at par. If no call has been exercised by the Issuer, the amount or assets received at maturity depend on the Worst Value on the Redemption Valuation Date and on whether a Knock-in Event has occurred. If the Worst Value is at least 100 per cent., the Final Redemption Amount per Calculation Amount is 100 per cent. If the Worst Value is below 100 per cent. and no Knock-in Event has occurred, the Final Redemption Amount per Calculation Amount is also 100 per cent. If the Worst Value is below 100 per cent. and a Knock-in Event has occurred, no Final Redemption Amount will be payable and Physical Delivery will apply. A Knock-in Event occurs if the Worst Intraday Value falls below 50 per cent. on any Knock-in Determination Day during the Knock-in Determination Period. Accordingly, the risk is most evident where one Share materially underperforms the others and its intraday value falls below the applicable Knock-in level during the Knock-in Determination Period, while its value on the Redemption Valuation Date remains below 100 per cent.

The Issuer does not intend to provide post-issuance information.

B.3.1	*What are the key risks that are specific to the Issuer?*

- The Issuer is dependent on the Guarantor to make payments on the Notes. If the Guarantor fails to pay interest or repay any loan made to it by the Issuer in a timely fashion this will have a material adverse effect on the ability of the Issuer to fulfil its obligations under the Notes.
- In the event of an eventual insolvency of the Issuer, there is uncertainty as to whether the insolvency proceedings would be opened in the Netherlands or in Spain.
- The Issuer may become taxable in a jurisdiction other than Spain and this may increase the aggregate tax burden of the Issuer.

(b) a default is made in the performance by the Issuer or the Guarantor of any other obligation under the provisions of the Notes or under the provisions of the Guarantee relating to the Notes and such default continues for more than 60 days following service by a Noteholder on the Issuer and the Guarantor of a notice requiring the same to be remedied; or

(c) the occurrence of various bankruptcy related events with respect to the Issuer or Guarantor.

C.1.4	*Ranking of the Notes in the Issuer's capital structure upon insolvency*

The Notes will constitute direct, unconditional, unsecured and unsubordinated obligations and will rank *pari passu* among themselves, with all other outstanding, unsecured and unsubordinated obligations of the Issuer present and future, but, in the event of insolvency, only to the extent permitted by applicable laws relating to creditor's rights.

C.1.5	*Restrictions on free transferability of the Notes*

There are no restrictions on the free transferability of the Notes. However, selling restrictions apply to offers, sales or transfers of the Notes under the applicable laws in various jurisdictions.

C.2	***Where will the Notes be traded***

Application will be made for the Notes to be listed on the official list of and admitted to trading on the regulated market of Euronext Dublin.

C.3	***What are the key risks that are specific to the Notes?***

There are a number of risks associated with an investment in the Notes. These risks include:

- The Notes may not be a suitable investment for all investors. The Notes are complex financial instruments and may entail significant risks not associated with investments in conventional securities such as debt or equity.
- There are specific risks relating to Equity Linked Notes.

- A Noteholder does not have rights of ownership in the Reference Item(s) and potential investors in Equity Linked Notes may receive less return than expected.
- There are specific risks relating to Reference Item Linked Notes. The Reference Item Linked Notes are securities which do not provide for predetermined redemption amounts and/or interest payments and the amounts payable (whether in respect of principal and/or interest) or deliverable will be dependent upon the performance of the Reference Item, or a combination of Reference Items, which themselves may contain substantial credit, interest rate, foreign exchange, correlation, time value, political and/or other risks.
- The past performance of a Reference Item is not indicative of future performance and the range of, or trends in, fluctuations in the Reference Item that may occur in the future. It is therefore possible that future performance of a Reference Item may differ from, and be worse than, such past performance.
- Investors may lose the original invested amount due to various reasons including without limitation: (a) possible insolvency proceedings or some other event impairing the ability of the Issuer and the Guarantor to meet its obligations under the Notes; (b) the fact that the terms of the relevant Notes do not provide for full repayment of the initial purchase price upon final maturity and/or mandatory early redemption of such Notes and the relevant Reference Item(s) perform in such a manner that the final redemption amount and/or mandatory early redemption amount is less than the initial purchase price; (c) the fact that the purchaser seeks to sell the relevant Notes prior to their scheduled maturity, and the sale price of the Notes in the secondary market is less than the purchaser's initial investment; and (d) the fact that the Notes are subject to certain adjustments in accordance with the terms and conditions of such Notes that may result in the scheduled amount to be paid or asset(s) to be delivered upon redemption being reduced to or being valued at an amount less than a purchaser's initial investment.
- Credit ratings assigned to the Issuer, the Guarantor or any Notes may not reflect all the risks associated with an investment in those Notes. Should the credit ratings of the Issuer, the Guarantor or any Notes be revised, suspended or withdrawn this could result in increased interest and other expenses on the Issuer's and the Guarantor's future borrowings and, therefore, have a material adverse effect on the Guarantor's business, results of operations, and financial condition.
- The Calculation Agent, which will generally be the Guarantor or an affiliate of the Guarantor, has broad discretionary powers which may not take into account the interests of the Noteholders. Potential conflicts of interest may exist between the Calculation Agent and the holders of the Notes, including with respect to the exercise of the very broad discretionary powers of the Calculation Agent.

C.4	***Is there a guarantee attached to the Notes?***
C.4.1	*Nature and scope of the guarantee*

The Notes will be unconditionally and irrevocably guaranteed by the Guarantor. The obligations of the Guarantor under its guarantee will be direct, unconditional and unsecured obligations of the Guarantor and will rank pari passu with all other unsecured and unsubordinated obligations of the Guarantor.

C.4.2	*Description of the Guarantor, including LEI*

The Guarantor is a limited liability company (a sociedad anónima or S.A.) and was incorporated under the Spanish Corporations Law on 1 October 1988. It has its registered office at Plaza de San Nicolás 4, Bilbao, Spain, 48005, and operates out of Calle Azul 4, 28050, Madrid, Spain. The LEI of the Guarantor is K8MS7FD7N5Z2WQ51AZ71.

C.4.4	*Risk factors relating to the Guarantor*

- **Macroeconomic Risks and Geopolitical Risks**: The Group is sensitive to the deterioration of economic conditions and the alteration of the institutional environment of the countries in which it operates, and especially Spain, Mexico and Turkey. The global economy is facing significant challenges, due in part to the policies of the U.S. administration and, more recently, the conflict in Iran. Tensions in the Middle East have led to increases in the prices of oil, gas and other energy-intensive goods, and a prolonged escalation could generate further inflationary pressures, financial volatility and weaker economic growth, while constraining the policy space of major central banks. These risks are compounded by the continuation of the conflict in Ukraine and other geopolitical tensions. In addition, the increase in U.S. tariffs on imports from its trading partners and the uncertainty regarding their final level and duration could negatively affect the global economy. Retaliatory measures, sustained uncertainty, weakened confidence and financial volatility could amplify these effects, while rising tariffs could further increase inflationary pressures in the United States and the Eurozone and constrain the Federal Reserve's ("Fed") and the ECB's ability to maintain or lower interest rates.
- **Business Risks**: The Group's businesses are subject to inherent risks concerning borrower and counterparty credit quality, and the value of collateral that strengthens its lending portfolio, particularly in Spain. Adverse changes in the

credit quality of the Group's borrowers and counterparties or collateral, or in their behaviour or businesses, may reduce the value of the Group's assets, and materially increase the Group's write-downs and loss allowances. Climate change, which is resulting in an increase in the intensity and frequency of extreme weather events and environmental degradation, presents short, medium and long-term risks to the Group and its customers and counterparties, with the risks expected to increase over time.

- **Financial Risks**: The Group has a continuous demand for liquidity to finance its activities and the withdrawal of deposits or other sources of liquidity could significantly affect it. In the event of a withdrawal of deposits or other sources of liquidity, especially if it is sudden or unexpected, the Group may not be able to finance its financial obligations or meet the minimum liquidity requirements that apply to it, and may be forced to incur higher financial costs, liquidate assets and take additional measures to reduce its level of leverage.
- **Legal, Regulatory, Tax and Compliance Risks**: The financial sector faces an environment of increasing regulatory and litigious pressure. The Group is frequently party to judicial, regulatory and administrative proceedings and investigations, as well as arbitration proceedings, including matters relating to consumer protection and other regulatory issues. Such proceedings may result in increased operating and compliance costs, fines or sanctions, reduced revenues, and reputational damage, and an adverse outcome could otherwise adversely affect the Group. Spanish judicial authorities have also investigated the provision of services by Centro Exclusivo de Negocios y Transacciones, S.L. ("Cenyt") to BBVA. On July 9, 2026, the judge issued an order opening oral proceedings in respect of the Bank for alleged offenses of bribery and discovery and revelation of secrets. It is not currently possible to predict the outcome of these proceedings or estimate their potential implications for the Group; an adverse outcome could result in potential fines and/or civil liabilities, neither of which would be material, as well as other adverse consequences, including potential adverse effects on the Group's reputation.
- **Operational Risks**: The Group's activities depend to a large extent on information technology systems and on its ability to process and report effectively and accurately on a high volume of complex transactions. The development and increasing use of digital technologies and artificial intelligence expose the Group to risks including cyber-attacks, theft or unauthorized use of internal and customer data, fraud in payment systems and unauthorized access to the Group's IT systems and client accounts. The Group is also exposed to model risk, including the possibility that models used in critical processes present deficiencies in their design, implementation, use or interpretation that could affect risk management, solvency, financial reporting, regulatory compliance or the Group's reputation. Any attack, failure or deficiency in the Group's systems or models could adversely affect its ability to carry out operations or provide services to the Group that could have a significant adverse impact on its business, financial condition, results of operations or reputation.

For further information on the Group's risk factors as of June 30, 2026, see Note 6.1 ("Risk factors") to the BBVA Group's Condensed Interim Consolidated Financial Statements as of and for the six months ended June 30, 2026.
