	Comisión Nacional del Mercado de Valores (CNMV) is responsible for supervising BBVA and Autoriteit Financiële Markten (AFM) is responsible for supervising BBVA Global Markets B.V. in relation to this Key Information Document. This PRIIP is authorised in Ireland.
Date of production of the KID	02/02/2024

You are about to purchase a product that is not simple and may be difficult to understand.

#### 1. What is this product?

Туре	Structured bond
Term	The product has a fixed term and will be due on 9 February 2027, subject to an early redemption.
<b>Objectives</b> (Terms that appear in bold in this section are	The product is designed to provide a return in the form of (1) conditional interest payments and (2) either a cash payment or the delivery of the <b>worst performing underlying</b> on termination of the product. What you may receive, and when, will depend on the performance of the <b>underlyings</b> . If, at maturity, the <b>final reference price</b> of the <b>worst performing underlying</b> has fallen below its <b>barrier price</b> , the product may return shares of a value that is less than the <b>product notional amount</b> or even zero.
described in more detail i the table(s) below.)	In <u>Early termination following an autocall:</u> The product will terminate prior to the <b>maturity date</b> if, on any <b>autocall observation date</b> , the <b>reference price</b> of the <b>worst performing underlying</b> is at or above its <b>autocall barrier price</b> . On any such early termination, you will on the immediately following <b>autocall payment date</b> receive, in addition to any final interest payment, a cash payment equal to the autocall payment of USD 1,000. No interest payments will be made on any date after such <b>autocall payment date</b> . The relevant dates are shown in the table(s) below.

Autocall observation dates	Autocall payment dates
3 February 2025	10 February 2025
2 February 2026	9 February 2026
2 February 2027	Maturity date

Interest: If the product has not terminated early, on each interest payment date you will receive an interest payment of USD 128.61 together with any previously unpaid interest payments if the reference price of the worst performing underlying is at or above its interest barrier price on the immediately preceding interest observation date. If this condition is not met, you will receive no interest payment on such interest payment date. The relevant dates are shown in the table(s) below.

Interest observation dates	Interest payment dates
3 February 2025	10 February 2025
2 February 2026	9 February 2026
2 February 2027	Maturity date

Termination on the maturity date: If the product has not terminated early, on the maturity date you will receive:

- 1. if the **final reference price** of the **worst performing underlying** is at or above its **barrier price**, a cash payment equal to USD 1,000; or
- 2. if the final reference price of the worst performing underlying is below its barrier price, physical delivery of the worst performing underlying. The number of shares of the worst performing underlying that will be delivered will be calculated as (i) the EUR equivalent of the product notional amount (calculated as of the final valuation date) divided by (ii) the strike price of such underlying. If this calculation would require delivery of part of a share of the relevant underlying, instead of receiving that part, you will be paid the cash equivalent in USD of the value of that part (the residual cash). The value of such shares plus the residual cash will generally be less than the amount you invested.

Under the product terms, certain dates specified above and below will be adjusted if the respective date is either not a business day or not a trading day (as applicable). Any adjustments may affect the return, if any, you receive.

The product terms also provide that if certain exceptional events occur (1) adjustments may be made to the product and/or (2) the issuer may terminate the product early. These events are specified in the product terms and principally relate to the **underlyings**, the product and the issuer. The return (if any) you receive on such early termination is likely to be different from the scenarios described above and may be less than the amount you invested.

You do not have any entitlement to a dividend from any of the **underlyings** and you have no right to any further entitlement resulting from any such **underlying** (e.g., voting rights).

Underlyings	Ordinary shares of Anheuser-Busch Inbev SA (ABI; ISIN: BE0974293251; Bloomberg: ABI BB Equity; RIC: ABI.BR) and BNP Paribas SA (BNPP; ISIN: FR0000131104; Bloomberg: BNP FP Equity; RIC: BNPP.PA)	Reference price	The closing price of an <b>underlying</b> as per the relevant <b>reference source</b>
Underlying market	Equity	Reference sources	<ul> <li>ABI: Euronext - Euronext Brussels</li> <li>BNPP: Euronext - Euronext Paris</li> </ul>
Product notional amoun	t USD 1,000	Final reference price	The reference price on the final valuation date

Issue price	100.00% of the <b>product notional</b> amount	Initial valuation date	2 February 2024
Product currency	U.S. Dollar (USD)	Final valuation date	2 February 2027
Underlying currencies	• ABI: Euro (EUR) • BNPP: EUR	Maturity date / term	9 February 2027
Issue date	9 February 2024	Autocall barrier price	100.00% of the initial reference price
Initial reference price	The reference price on the initial valuation date	Interest barrier price	60.00% of the initial reference price
Strike price	100.00% of the initial reference price	Worst performing underlying	The underlying for which the result of dividing the final reference price the final reference level by the initial reference price is the lowest amount (i.e., closer to 0)
Barrier price	60.00% of the initial reference price		

# Intended retail investor

The product is intended to be offered to retail investors who fulfil all of the criteria below:

- 1. they have the ability to make an informed investment decision through sufficient knowledge and understanding of the product and its specific risks and rewards, either independently or through professional advice, and they may have experience of investing in and/or holding a number of similar products providing a similar market exposure;
- 2. they seek income, expect the movement in the underlyings to perform in a way that generates a positive return. They have a short investment horizon and understand that the product may terminate early;
- 3. they are able to bear a total loss of their initial investment, consistent with the redemption profile of the product at maturity (market risk);
- 4. they accept the risk that the issuer could fail to pay or perform its obligations under the product irrespective of the redemption profile of the product (credit risk);
- 5. they are willing to accept a level of risk of 6 out of 7 to achieve potential returns, which reflects the second highest risk (as shown in the summary risk indicator below which takes into account both market risk and credit risk).

### 2. What are the risks and what could I get in return?

#### **Risk indicator**

Performance scenarios

1	2 3	4 5	6 7
Lower risk			Higher risk

This product does not in	clude any protection from future market p	performance so you could lose so	me or all of your investment.
If we are not able to pay	you what is owed, you could lose your ent	ire investment.	
What you will get from cannot be accurately p	this product depends on future market p redicted.	erformance. Market developmen	ts in the future are uncertain and
The scenarios shown an differently in the future	re illustrations based on results from the e.	past and on certain assumption	s. Markets could develop very
Recommended holding p	period:	Until the product is called or m	atures
		This may be different in each sc	enario and is indicated in the table
Example investment:		USD 10,000	
Scenarios		lf you exit after 1 year	If you exit at call or maturity
Minimum	There is no minimum guaranteed retu	rn. You could lose some or all of	your investment.
Stress (product ends after 3 years)	What you might get back after costs Average return each year	USD 1,744 -82.48%	USD 1,390 -48.20%
<b>Unfavourable</b> (product ends after 3 years)	What you might get back after costs Average return each year	USD 5,430 -45.61%	USD 3,780 -27.70%
Modorato	What you might got back after costs		LISD 11 286

years)			
Moderate (product ends after 1 ye	What you might get back after costs ar) Average return each year		USD 11,286 12.82%
Favourable (product ends after 3 vears)	What you might get back after costs Average return each year	USD 10,742 7.40%	USD 13,858 11.49%

The stress scenario shows what you might get back in extreme market circumstances. The favorable, moderate and unfavorable scenarios have been calculated using 10,000 simulations based on the underlying asset's past performance and represent the 90th, 50th and 10th percentile outcomes, respectively.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. Payments made to a client during the life of a product requires BBVA to make certain assumptions. This is for the purpose of undertaking

## 3. What happens if BBVA Global Markets B.V. is unable to pay out?

Banco Bilbao Vizcaya Argentaria, S.A. guarantees the payment obligations that the Issuer assumes in the Product, in its same terms. The Product is not covered by the Credit Institutions Deposit Guarantee Scheme or any other guarantee scheme. In the event that BBVA as guarantor could not pay, you would face a financial loss. In the event of the resolution of the Guarantor of such financial instrument (applicable process when the Guarantor is insolvent or it is expected that it will become insolvent in the near future and due to public interest and financial stability it is necessary to avoid its insolvency), such product could be converted into shares or its Nominal Amount and, as a result, you could make losses in their investment.

### 4. What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

**Costs over time** The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different investment periods.

The duration of this product is uncertain as it may terminate at different times depending on how the market evolves. The amounts shown here consider two different scenarios (early call and maturity). In case you decide to exit before the product ends, exit costs may apply in addition to the amounts shown here.

We have assumed:

• USD 10,000 is invested

• a performance of the product that is consistent with each holding period shown.

	If the product is called at the first If the product reaches mat possible date, on 10 February 2025	
Total costs	USD 295	USD 295
Annual cost impact*	3.4% each year	1.1% each year

\*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at maturity your average return per year is projected to be 12.6% before costs and 11.5% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

# Composition of costs

One-off costs upon entry or exit		
Entry costs	3.0% of the amount you pay when entering this investment. These costs are already included in the price you pay.	USD 295
Exit costs	1.5% of your investment before it is paid out to you. These costs are already included in the price you receive and are only incurred if you exit before maturity. If an early redemption occurs or if you hold the product until maturity, no exit costs will be incurred.	USD 150
	Ongoing costs taken each year	
Management fees and other administrative or operating costs	0.0% of your investment amount per year. This is an estimate of the actual costs.	USD 0
Transaction costs	0.0% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	USD 0

# 5. How long should I hold it and can I take money out early?

### **Recommended holding period: 3 years**

This Product doesn't allow the Client to cancel his investment. However, under normal market conditions, BBVA may facilitate to the client the price at which BBVA is able to buy it. Such a price will be calculated subtracting (i) from the fair value of the Product calculated by BBVA in accordance to the market variables and methodologies commonly used in market (ii) an estimated cost of 1.5% over the Nominal Amount. This anticipated sale may generate a financial loss to the Client.

# 6. How can I complain?

Customer Service. P.O. Box Apdo. Correos 1598. 28080 Madrid. e-mail: reclamacionesSAC@bbva.com. Telephone: +34 915 378 385. Web: www.bbva.es. For claims related to the sale or advice of this Product by an entity other than BBVA, please contact the entity which sold you or advised you about the Product.

# 7. Other relevant information

For further information about the functioning and risks of this Product, contact the entity which advises you or which is going to sell the Product to you. Prospectus registered with the Central Bank of Ireland. The Product will be issued under the most recent version of the Prospectus of the Issuer, which is available on the website of BBVA (https://shareholdersandinvestors.bbva.com/debt-investors/programas/structured-medium-term-note/). The Client should also check the issue terms of the Product. According to the Prospectus, the Product is governed by English law and the Client submits to the jurisdiction of the English courts.
