Date of production of the KID	08/04/2024

You are about to purchase a product that is not simple and may be difficult to understand.

1. What is this product?

I. WHAT IS THIS	
Туре	Structured bond
Term	The product has a fixed term and will be due on 26 April 2030, subject to an early redemption.
Objectives	The product is designed to provide a return in the form of a cash payment on termination of the product. The timing and an of this payment will depend on the performance of the underlyings . The payment at maturity will not exceed USD 1619 20

(Terms that appear in bold in this section are described in more detail in the table(s) below.)

The product is designed to provide a return in the form of a cash payment on termination of the product. The timing and amount of this payment will depend on the performance of the **underlyings**. The payment at maturity will not exceed USD 1,619.20. If, at maturity, the **final reference level** of the **worst performing underlying** has fallen below 50.00% of its **initial reference level**, the product may return less than the **product notional amount** or even zero.

described in more detail in <u>Early termination following an autocall</u>: The product will terminate prior to the **maturity date** if, on any **autocall observation date**, the table(s) below.) reference level of each underlying is (or, on any prior autocall observation date, has been) at or above its autocall barrier level (the autocall condition). In other words, the product will terminate once each underlying has satisfied the autocall condition at least once; however, it is not necessary for all underlyings to satisfy the autocall condition simultaneously. On any such early termination, you will on the immediately following autocall payment date receive a cash payment equal to the applicable autocall payment. The relevant dates and autocall payments are shown in the table(s) below.

Autocall observation dates	Autocall payment dates	Autocall payments
21 April 2025	28 April 2025	USD 1,103.20
20 October 2025	27 October 2025	USD 1,154.80
20 April 2026	27 April 2026	USD 1,206.40
19 October 2026	26 October 2026	USD 1,258
19 April 2027	26 April 2027	USD 1,309.60
19 October 2027	26 October 2027	USD 1,361.20
19 April 2028	26 April 2028	USD 1,412.80
19 October 2028	26 October 2028	USD 1,464.40
19 April 2029	26 April 2029	USD 1,516
19 October 2029	26 October 2029	USD 1,567.60

Termination on the maturity date: If the product has not terminated early, on the maturity date you will receive:

- 1. if the **final reference level** of the **worst performing underlying** is at or above its **initial reference level**, a cash payment equal to USD 1,619.20;
- 2. if the final reference level of the worst performing underlying is at or above 50.00% of its initial reference level and below its initial reference level, a cash payment equal to USD 1,000; or
- 3. if the final reference level of the worst performing underlying is below 50.00% of its initial reference level, a cash payment directly linked to the performance of the worst performing underlying. The cash payment will equal (i) the product notional amount multiplied by (ii) (A) the final reference level of the worst performing underlying divided by (B) its initial reference level.

Under the product terms, certain dates specified above and below will be adjusted if the respective date is either not a business day or not a trading day (as applicable). Any adjustments may affect the return, if any, you receive.

The product terms also provide that if certain exceptional events occur (1) adjustments may be made to the product and/or (2) the issuer may terminate the product early. These events are specified in the product terms and principally relate to the **underlyings**, the product and the issuer. The return (if any) you receive on such early termination is likely to be different from the scenarios described above and may be less than the amount you invested.

Underlyings	IBEX 35 Index (Price return index) (IBEX; ISIN: ESOSI0000005; Bloomberg: IBEX Index), Nikkei 225 (Price return index) (NKY; ISIN: JP9010C00002; Bloomberg: NKY Index), S&P 500 INDEX (SPX; ISIN: US78378X1072; Bloomberg: SPX Index) and OMX Stockholm 30 Index (Price return index) (OMX; ISIN: SE0000337842; Bloomberg: OMX Index)	Reference level	The closing level of an underlying as per the relevant reference source
Underlying market	Equity	Reference sources	IBEX: Madrid Stock Exchange NKY: Nikkei SEX: Standard & Poor's

			 OMX: NASDAQ OMX Stockholm
Product notional amoun	t USD 1,000	Final reference level	The reference level on the final valuation date
Issue price	100.00% of the product notional amount	Initial valuation date	23 April 2024
Product currency	U.S. Dollar (USD)	Final valuation date	23 April 2030
Underlying currencies	 IBEX: Euro (EUR) NKY: Japanese Yen (JPY) SPX: USD OMX: Swedish Krona (SEK) 	Maturity date / term	26 April 2030
Issue date	26 April 2024	Autocall barrier level	100.00% of the initial reference level
Initial reference level	The reference level on the initial valuation date	Worst performing underlying	The underlying for which the result of dividing the final reference level by the initial reference level is the lowest amount (i.e., closer to 0)

Intended retail

investor

The product is intended to be offered to retail investors who fulfil all of the criteria below:

- 1. they have the ability to make an informed investment decision through sufficient knowledge and understanding of the product and its specific risks and rewards, either independently or through professional advice, and they may have experience of investing in and/or holding a number of similar products providing a similar market exposure;
- 2. they seek capital growth, expect the movement in the underlyings to perform in a way that generates a positive return. They have a long investment horizon and understand that the product may terminate early;
- they are able to bear a total loss of their initial investment, consistent with the redemption profile of the product at maturity (market risk);
- 4. they accept the risk that the issuer could fail to pay or perform its obligations under the product irrespective of the redemption profile of the product (credit risk);
- 5. they are willing to accept a level of risk of 5 out of 7 to achieve potential returns, which reflects a medium-high risk (as shown in the summary risk indicator below which takes into account both market risk and credit risk).

2. What are the risks and what could I get in return?

Risk indicator

	product as 5 out of 7, which is a medium-h m-high level, and poor market conditions		
	sk. You will receive payments in a different		
	irrencies. This risk is not considered in the		d will get depend on the exchange
This product does not ir	clude any protection from future market	performance so you could lose s	ome or all of your investment.
	you what is owed, you could lose your end		-
The scenarios shown an differently in the future Recommended holding p		Until the product is called or	
Example investment:		USD 10,000	
Scenarios		lf you exit after 1 year	If you exit at call or maturity
Minimum	There is no minimum guaranteed retu		, ,
Stress	What you might get back after costs	USD 3,732	USD 2,083
(product ends after 6 years)	Average return each year	-62.48%	-23.01%
Unfavourable	What you might get back after costs	USD 6,049	USD 3,538
(product ends after 6 years)	Average return each year	-39.34%	-15.90%
Moderate	What you might get back after costs	USD 8,219	USD 10,000
(product ends after 6 years)	Average return each year	-17.72%	0.00%
Favourable	What you might get back after costs	USD 10,377	USD 13,612
(product ends after 3 years and 6 months)	Average return each year	3.75%	9.21%
The stress scenario sho	ws what you might get back in extreme ma	arket circumstances. The favora	ble moderate and unfavorable

The stress scenario shows what you might get back in extreme market circumstances. The favorable, moderate and unfavorable scenarios have been calculated using 10,000 simulations based on the underlying asset's past performance and represent the 90th, 50th and 10th percentile outcomes, respectively.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. Payments made to a client during the life of a product requires BBVA to make certain assumptions. This is for the purpose of undertaking

3. What happens if BBVA Global Markets B.V. is unable to pay out?

Banco Bilbao Vizcaya Argentaria, S.A. guarantees the payment obligations that the Issuer assumes in the Product, in its same terms. The Product is not covered by the Credit Institutions Deposit Guarantee Scheme or any other guarantee scheme. In the event that BBVA as guarantor could not pay, you would face a financial loss. In the event of the resolution of the Guarantor of such financial instrument (applicable process when the Guarantor is insolvent or it is expected that it will become insolvent in the near future and due to public interest and financial stability it is necessary to avoid its insolvency), such product could be converted into shares or its Nominal Amount and, as a result, you could make losses in their investment.

4. What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different investment periods.

The duration of this product is uncertain as it may terminate at different times depending on how the market evolves. The amounts shown here consider two different scenarios (early call and maturity). In case you decide to exit before the product ends, exit costs may apply in addition to the amounts shown here.

We have assumed:

• USD 10,000 is invested

• a performance of the product that is consistent with each holding period shown.

	If the product is called at the first possible date, on 28 April 2025	If the product reaches maturity
Total costs	USD 1,092	USD 1,092
Annual cost impact*	13.4% each year	1.9% each year

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at maturity your average return per year is projected to be 1.9% before costs and 0.0% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

Composition of costs

One-off costs upon entry or exit		
Entry costs	10.9% of the amount you pay when entering this investment. These costs are already included in the price you pay.	USD 1,092
Exit costs	This product does not incur any exit fees if held until maturity. The exit fee in case of an early exit is defined in the section "How long should I hold it and can I take money out early?"	USD 150
	Ongoing costs taken each year	
Management fees and other administrative or operating costs	0.0% of your investment amount per year. This is an estimate of the actual costs.	USD 0
Transaction costs	0.0% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	USD 0

5. How long should I hold it and can I take money out early?

Recommended holding period: 6 years

This Product doesn't allow the Client to cancel his investment. However, under normal market conditions, BBVA may facilitate to the client the price at which BBVA is able to buy it. Such a price will be calculated subtracting (i) from the fair value of the Product calculated by BBVA in accordance to the market variables and methodologies commonly used in market (ii) an estimated cost of 1.5% over the Nominal Amount. This anticipated sale may generate a financial loss to the Client.

6. How can I complain?

Customer Service. P.O. Box Apdo. Correos 1598. 28080 Madrid. e-mail: reclamacionesSAC@bbva.com. Telephone: +34 915 378 385. Web: www.bbva.es. For claims related to the sale or advice of this Product by an entity other than BBVA, please contact the entity which sold you or advised you about the Product.

7. Other relevant information

For further information about the functioning and risks of this Product, contact the entity which advises you or which is going to sell the Product to you. Prospectus registered with the Central Bank of Ireland. The Product will be issued under the most recent version of the Prospectus of the Issuer, which is available on the website of BBVA (https://shareholdersandinvestors.bbva.com/debt-investors/programas/structured-medium-term-note/). The Client should also check the issue terms of the Product. According to the Prospectus, the Product is governed by English law and the Client submits to the jurisdiction of the English courts.
