	Comisión Nacional del Mercado de Valores (CNMV) is responsible for supervising BBVA and Autoriteit Financiële Markten (AFM) is responsible for supervising BBVA Global Markets B.V. in relation to this Key Information Document. This PRIIP is authorised in Ireland.
Date of production of the KID	11/04/2024

You are about to purchase a product that is not simple and may be difficult to understand.

1. What is this product?

Type Structured bond

Term The product has a fixed term and will be due on 6 June 2029, subject to an early redemption.

Objectives

(Terms that appear in bold in this section are described in more detail in the table(s) below.)

The product is designed to provide a return in the form of a cash payment on termination of the product. The timing and amount of this payment will depend on the performance of the **underlyings**. The payment at maturity will not exceed EUR 1,525. If, at maturity, the **final reference price** of the **worst performing underlying** has fallen below 60.00% of its **initial reference price**, the product may return less than the **product notional amount** or even zero.

Early termination following an autocall: The product will terminate prior to the **maturity date** if, on any **autocall observation date**, the **reference price** of the **worst performing underlying** is at or above its **autocall barrier price**. On any such early termination, you will on the immediately following **autocall payment date** receive a cash payment equal to the applicable **autocall payment**. The relevant dates and **autocall payments** are shown in the table(s) below.

Autocall observation dates	*Autocall payment dates*	*Autocall payments*
23 May 2025	6 June 2025	EUR 1,105
25 August 2025	8 September 2025	EUR 1,131.25
24 November 2025	8 December 2025	EUR 1,157.50
23 February 2026	9 March 2026	EUR 1,183.75
26 May 2026	9 June 2026	EUR 1,210
24 August 2026	7 September 2026	EUR 1,236.25
23 November 2026	7 December 2026	EUR 1,262.50
23 February 2027	9 March 2027	EUR 1,288.75
24 May 2027	7 June 2027	EUR 1,315
23 August 2027	6 September 2027	EUR 1,341.25
23 November 2027	7 December 2027	EUR 1,367.50
23 February 2028	8 March 2028	EUR 1,393.75
23 May 2028	6 June 2028	EUR 1,420
23 August 2028	6 September 2028	EUR 1,446.25
24 November 2028	8 December 2028	EUR 1,472.50
23 March 2029	9 April 2029	EUR 1,498.75

Termination on the maturity date: If the product has not terminated early, on the **maturity date** you will receive:

1. if the **final reference price** of the **worst performing underlying** is at or above 80.00% of its **initial reference price**, a cash payment equal to EUR 1,525;
2. if the **final reference price** of the **worst performing underlying** is at or above 60.00% of its **initial reference price** and below 80.00% of its **initial reference price**, a cash payment equal to EUR 1,000; or
3. if the **final reference price** of the **worst performing underlying** is below 60.00% of its **initial reference price**, a cash payment directly linked to the performance of the **worst performing underlying**. The cash payment will equal (i) the **product notional amount** multiplied by (ii) (A) the **final reference price** of the **worst performing underlying** divided by (B) its **initial reference price**.

Under the product terms, certain dates specified above and below will be adjusted if the respective date is either not a business day or not a trading day (as applicable). Any adjustments may affect the return, if any, you receive.

The product terms also provide that if certain exceptional events occur (1) adjustments may be made to the product and/or (2) the issuer may terminate the product early. These events are specified in the product terms and principally relate to the **underlyings**, the product and the issuer. The return (if any) you receive on such early termination is likely to be different from the scenarios described above and may be less than the amount you invested.

You do not have any entitlement to a dividend from any of the **underlyings** and you have no right to any further entitlement resulting from any such **underlying** (e.g., voting rights).

Underlyings	Ordinary shares of Engie SA (ENGIE; ISIN: FR0010208488; Bloomberg: ENGI FP Equity; RIC: ENGIE.PA) and Schlumberger NV (SLB; ISIN:	**Reference price**	The closing price of an **underlying** as per the relevant **reference source**

	AN8068571086; Bloomberg: SLB UN Equity; RIC: SLB.N)		
Underlying market	Equity	**Reference sources**	• ENGIE: Euronext - Euronext Paris • SLB: New York Stock Exchange, Inc.
Product notional amount	EUR 1,000	**Final reference price**	The **reference price** on the **final valuation date**
Issue price	100.00% of the **product notional amount**	**Initial valuation dates**	11 April 2024, 18 April 2024, 25 April 2024, 2 May 2024, 9 May 2024, 16 May 2024 and 23 May 2024
Product currency	Euro (EUR)	**Final valuation date**	23 May 2029
Underlying currencies	• ENGIE: EUR • SLB: U.S. Dollar (USD)	**Maturity date / term**	6 June 2029
Issue date	23 May 2024	**Autocall barrier price**	100.00% of the **initial reference price**
Initial reference price	The average of the **reference prices** observed on the **initial valuation dates**	**Worst performing underlying**	The **underlying** for which the result of dividing the **final reference price** by the **initial reference price** is the lowest amount (i.e., closer to 0)

Intended retail investor

The product is intended to be offered to retail investors who fulfil all of the criteria below:

1. they have the ability to make an informed investment decision through sufficient knowledge and understanding of the product and its specific risks and rewards, either independently or through professional advice, and they may have experience of investing in and/or holding a number of similar products providing a similar market exposure;
2. they seek capital growth, expect the movement in the underlyings to perform in a way that generates a positive return. They have a long investment horizon and understand that the product may terminate early;
3. they are able to bear a total loss of their initial investment, consistent with the redemption profile of the product at maturity (market risk);
4. they accept the risk that the issuer or guarantor could fail to pay or perform its obligations under the product irrespective of the redemption profile of the product (credit risk);
5. they are willing to accept a level of risk of 6 out of 7 to achieve potential returns, which reflects the second highest risk (as shown in the summary risk indicator below which takes into account both market risk and credit risk).

2. What are the risks and what could I get in return?

Risk indicator

1	2	3	4	5	**6**	7

Lower risk — Higher risk

The risk indicator assumes you keep the product until 6 June 2029. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to cash in early. You may have to pay significant extra costs to cash in early.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 6 out of 7, which is the second-highest risk class. This rates the potential losses from future performance at a high level, and poor market conditions are very unlikely to impact our capacity to pay you.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

Recommended holding period:		**Until the product is called or matures** This may be different in each scenario and is indicated in the table	
Example investment:		EUR 10,000	
Scenarios		*If you exit after 1 year*	*If you exit at call or maturity*
Minimum	**There is no minimum guaranteed return. You could lose some or all of your investment.**		
Stress (product ends after 5 years)	**What you might get back after costs** Average return each year	EUR 677 -93.23%	EUR 306 -49.96%
Unfavourable (product ends after 5 years)	**What you might get back after costs** Average return each year	EUR 3,340 -66.60%	EUR 1,337 -32.93%
Moderate (product ends after 5 years)	**What you might get back after costs** Average return each year	EUR 5,730 -42.70%	EUR 5,454 -11.34%
Favourable (product ends after 2 years)	**What you might get back after costs** Average return each year	EUR 10,887 8.87%	EUR 12,100 9.77%

The stress scenario shows what you might get back in extreme market circumstances. The favorable, moderate and unfavorable scenarios have been calculated using 10,000 simulations based on the underlying asset's past performance and represent the 90th, 50th and 10th percentile outcomes, respectively.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. Payments made to a client during the life of a product requires BBVA to make certain assumptions. This is for the purpose of undertaking scenario analysis and the calculation of product profitability as shown in the table. BBVA has decided not to capitalize these payments.

DocID: 10704871 / 2570f5e3-9da2-4184-959d-9b1353522996

3. What happens if BBVA Global Markets B.V. is unable to pay out?

Banco Bilbao Vizcaya Argentaria, S.A. guarantees the payment obligations that the Issuer assumes in the Product, in its same terms. The Product is not covered by the Credit Institutions Deposit Guarantee Scheme or any other guarantee scheme. In the event that BBVA as guarantor could not pay, you would face a financial loss. In the event of the resolution of the Guarantor of such financial instrument (applicable process when the Guarantor is insolvent or it is expected that it will become insolvent in the near future and due to public interest and financial stability it is necessary to avoid its insolvency), such product could be converted into shares or its Nominal Amount and, as a result, you could make losses in their investment.

4. What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different investment periods.

The duration of this product is uncertain as it may terminate at different times depending on how the market evolves. The amounts shown here consider two different scenarios (early call and maturity). In case you decide to exit before the product ends, exit costs may apply in addition to the amounts shown here.

We have assumed:

- EUR 10,000 is invested
- a performance of the product that is consistent with each holding period shown.

	If the product is called at the first possible date, on 6 June 2025	*If the product reaches maturity*
Total costs	EUR 903	EUR 903
Annual cost impact*	10.5% each year	1.7% each year

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at maturity your average return per year is projected to be -9.7% before costs and -11.3% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	9.0% of the amount you pay when entering this investment. These costs are already included in the price you pay.	EUR 903
Exit costs	This product does not incur any exit fees if held until maturity. The exit fee in case of an early exit is defined in the section “How long should I hold it and can I take money out early?"	EUR 150
Ongoing costs taken each year		
Management fees and other administrative or operating costs	0.0% of your investment amount per year. This is an estimate of the actual costs.	EUR 0
Transaction costs	0.0% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	EUR 0

5. How long should I hold it and can I take money out early?

Recommended holding period: 5 years

This Product doesn't allow the Client to cancel his investment before 6 June 2029. However, under normal market conditions, BBVA may facilitate to the client the price at which BBVA is able to buy it. Such a price will be calculated subtracting (i) from the fair value of the Product calculated by BBVA in accordance to the market variables and methodologies commonly used in market (ii) an estimated cost of 1.5% over the Nominal Amount. This anticipated sale may generate a financial loss to the Client.

6. How can I complain?

Customer Service. P.O. Box Apdo. Correos 1598. 28080 Madrid. e-mail: reclamacionesSAC@bbva.com. Telephone: +34 915 378 385. Web: www.bbva.es. For claims related to the sale or advice of this Product by an entity other than BBVA, please contact the entity which sold you or advised you about the Product.

7. Other relevant information

For further information about the functioning and risks of this Product, contact the entity which advises you or which is going to sell the Product to you. Prospectus registered with the Central Bank of Ireland. The Product will be issued under the most recent version of the Prospectus of the Issuer, which is available on the website of BBVA (https://shareholdersandinvestors.bbva.com/debt-investors/programas/structured-medium-term-note/). The Client should also check the issue terms of the Product. According to the Prospectus, the Product is governed by English law and the Client submits to the jurisdiction of the English courts.
