You are about to purchase a product that is not simple and may be difficult to understand.

1. What is this product?

Type

Structured bond

Term

The product has a fixed term and will be due on 10 July 2029, subject to the occurrence of a credit event.

Objectives

(Terms that appear in bold in more detail in the table(s) Interest below.)

The product is designed to provide a return in the form of (1) regular interest payments and (2) a cash payment on termination of the product subject to the occurrence of a credit event. Whether interest is payable and the timing and amount of any cash payment upon termination will depend on whether one or more credit events are determined to have occurred during the credit observation period. Your initial investment is in this section are described not protected. You may not make any profit and you may lose some or all of your initial investment.

If the proportion of the reference index impacted by the credit events is less than 12.00%, on each interest payment date you $will receive an interest payment calculated by multiplying the {\it product notional amount}\ by\ the\ interest\ rate\ of\ 4.00\%\ per\ annum$ and then applying the relevant day count fraction to adjust this amount to reflect the length of the relevant interest period.

Interest payment dates
10 January 2025
10 July 2025
12 January 2026
10 July 2026
11 January 2027
12 July 2027
10 January 2028
10 July 2028
10 January 2029
Maturity date

- If the proportion of the reference index impacted by the credit events is higher or equal to 12.00% but less than 24.00%, on each interest payment date, you will receive the interest described above adjusted based on the proportion of reference index impacted by the credit events during the elapsed credit observation period. The interest to be paid reduces every time the proportion of the reference index impacted by the credit events increases. In that case, the interest payment will equal to (A) the interest payment described above minus (B) (i) that amount multiplied by (ii) the difference between (x) the proportion of the reference index impacted by the credit events and (y) 12.00% (the tranche starting point) divided by (iii) 12.00% (the tranche
- If the proportion of the reference index impacted by the credit events is higher or equal to 24.00%, no further interest payments will be made following the interest payment date immediately preceding the credit determination date.

Principal redemption:

- If the proportion of the reference index impacted by the credit events is less than 12.00%, on the maturity date you will receive a cash payment equal to CHF 1,000.00.
- If the proportion of the reference index impacted by the credit events is higher or equal to 12.00% but less than 24.00%, on the maturity date you will receive (A) CHF 1,000.00 minus (B) (i) CHF 1,000.00 multiplied by (ii) the difference between (x) the proportion of reference index impacted by the credit events and (y) 12.00% (the tranche starting point) divided by (iii) 12.00% (the tranche range)
- If the proportion of the reference index impacted by the credit events is higher or equal to 24.00%, on the maturity date you will receive no repayment of your principal amount.

Credit event: The reference entity experiences a credit event if one of the events listed below occurs. A CDDC, or the product calculation agent. will determine whether one of these events has occurred.

Reference entities	Events	
Markit iTraxx Europe Crossover S41 Bankruptcy, Failure to Pay and		
Index	Restructuring	

- Bankruptcy: the reference entity experiences insolvency, bankruptcy or related events.
- 2 Failure to Pay: the reference entity fails to make payments due on its debt above a prescribed threshold.
- 3. Restructuring: the reference entity's debt is restructured on terms that are detrimental to the holder(s) of the relevant debt in a form that is binding on all holder(s).
- 4. Obligation Acceleration: the reference entity's debt is declared due and payable due to a default other than a payment failure.
- Repudiation/Moratorium: the reference entity or a governmental authority disclaims or rejects any of its debt or declares a standstill or deferral of its debt and this is followed by a restructuring or failure to pay.

Under the product terms, certain dates specified above and below will be adjusted if the respective date is either not a business day or not a trading day (as applicable). Any adjustments may affect the return, if any, you receive.

In addition to the consequences that result from the occurrence of a credit event, the product terms also provide that if certain other exceptional events occur (1) adjustments may be made to the product, (2) certain fallback provisions may apply and/or (3) the issuer may terminate the product early fully or in part. These events are specified in the product terms and principally relate to the reference entity, the product and the issuer. The return (if any) you receive on an early redemption following the occurrence of an exceptional event will be different and is likely to be less than the amount you invested.

Reference entities	The 75 constituents of the reference index	Product calculation agent	BBVA GMBV
Reference index	Markit iTraxx Europe Crossover S41 Index	Issue date	6 September 2024
Reference entity transaction type	Various	Maturity date / term	10 July 2029
Credit weighting	For each reference entity: 1 divided by the number of reference entities	Credit observation period start date	If: (i) a credit event is determined by a CDDC, the date that is sixty calendar days prior to the date the relevant request to the CDDC was made; or, otherwise (ii) a date falling up to sixty calendar days prior to the earlier of (a) if the determination of a credit event is made by the product calculation agent, the trade date or (b) the date a request is made to a CDDC (and such request could be made prior to the trade date)
Product notional amount	CHF 1,000	Trade date	6 August 2024
Issue price	83.90% of the product notional amount	Credit observation period end date	20 June 2029
Product currency	Swiss Franc (CHF)	Credit observation period	The period commencing (and including) on the Credit observation period start date and ending on (and including) the Credit observation period end date
Tranche	The proportion of the reference index impacted by the credit events reducing the principal redemption and interest, starting at 12.00% and ending at 24.00%	Credit determination date	Either the date on which the CDDC is asked to determine whether the relevant credit event has occurred or, the date on which the product calculation agent (or other relevant transaction party) gives notice that a credit event has occurred
Proportion of the reference index impacted by the credit events	The sum of the credit weighting for each reference entity that suffered a credit event	Interest period	Each period from, and including, an interest payment date (or the issue date in the case of the initial interest period) to, but excluding, the next interest payment date (or the maturity date, in the case of the final interest period)

Intended retail investor

- they have the ability to make an informed investment decision through sufficient knowledge and understanding of the product and
 its specific risks and rewards, either independently or through professional advice, and they may have experience of investing in
 and/or holding a number of similar products providing a similar market exposure;
- 2. they seek income, expect the movement in the underlying to perform in a way that generates a positive return. They have a medium investment horizon:
- they are able to bear a total loss of their initial investment, consistent with the redemption profile of the product at maturity (market risk);
- 4. they accept the risk that the issuer could fail to pay or perform its obligations under the product irrespective of the redemption profile of the product (credit risk);
- 5. they are willing to accept a level of risk of 6 out of 7 to achieve potential returns, which reflects the second highest risk (as shown in the summary risk indicator below which takes into account both market risk and credit risk).

2. What are the risks and what could I get in return?

Risk indicator

1 | 2

3

4

5

6

7

Lower risk Higher risk

The risk indicator assumes you keep the product until 10 July 2029. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to cash in early. You may have to pay significant extra costs to cash in early.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 6 out of 7, which is the second-highest risk class. This rates the potential losses from future performance at a high level, and poor market conditions are very unlikely to impact our capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

If we are not able to pay you what is owed, you could lose your entire investment.

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

Recommended holding period:	4 years and 10 months
Example investment:	CHF 10,000

Scenarios		If you exit after 1 year	If you exit after 4 years and 10 months	
			(Recommended holding period)	
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.			
Stress	What you might get back after costs	CHF 41	CHF 403	
	Average return each year	-99.57%	-48.45%	
Unfavourable	What you might get back after costs	CHF 10,755	CHF 4,218	
	Average return each year	7.51%	-16.32%	
Moderate	What you might get back after costs	CHF 11,229	CHF 14,229	
	Average return each year	12.22%	7.55%	
Favourable	What you might get back after costs	CHF 11,674	CHF 14,229	
	Average return each year	16.64%	7.55%	

The stress scenario shows what you might get back in extreme market circumstances. The favorable, moderate and unfavorable scenarios have been calculated using 10,000 simulations based on the underlying asset's past performance and represent the 90th, 50th and 10th percentile outcomes, respectively.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. Payments made to a client during the life of a product requires BBVA to make certain assumptions. This is for the purpose of undertaking scenario analysis and the calculation of product profitability as shown in the table. BBVA has decided not to capitalize these payments.

3. What happens if BBVA Global Markets B.V. is unable to pay out?

Banco Bilbao Vizcaya Argentaria, S.A. guarantees the payment obligations that the Issuer assumes in the Product, in its same terms. The Product is not covered by the Credit Institutions Deposit Guarantee Scheme or any other guarantee scheme. In the event that BBVA as guarantor could not pay, you would face a financial loss. In the event of the resolution of the Guarantor of such financial instrument (applicable process when the Guarantor is insolvent or it is expected that it will become insolvent in the near future and due to public interest and financial stability it is necessary to avoid its insolvency), such product could be converted into shares or its Nominal Amount and, as a result, you could incur losses on your investment.

4. What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- · CHF 10,000 is invested

	If you exit after 1 year	If you exit after 4 years and 10 months
Total costs	CHF 1,572	CHF 1,513
Annual cost impact*	18.4%	3.7% each year

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 11.3% before costs and 7.6% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

Composition of costs

	One-off costs upon entry or exit	If you exit after 1 year
Entry costs	15.1% of the amount you pay when entering this investment. These costs are already included in the price you pay.	CHF 1,513
Exit costs	This product does not incur any exit fees if held until maturity. The exit fee in case of an early exit is defined in the section "How long should I hold it and can I take money out early?"	CHF 60
	Ongoing costs taken each year	
Management fees and other administrative or operating costs	0.0% of your investment amount per year. This is an estimate of the actual costs.	CHF 0
Transaction costs	0.0% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	CHF 0

5. How long should I hold it and can I take money out early?

Recommended holding period: 4 years and 10 months

This Product will mature on 10 July 2029. This Product doesn't allow the Client to cancel his investment before 10 July 2029. However, under normal market conditions, BBVA may facilitate to the client the price at which BBVA is able to buy it. Such a price will be calculated subtracting (i) from the fair value of the Product calculated by BBVA in accordance to the market variables and methodologies commonly used in market (ii) an estimated cost of 0.5% over the Nominal Amount. This anticipated sale may generate a financial loss to the Client.

6. How can I complain?

Customer Service. P.O. Box 1598. 28080 Madrid. e-mail: reclamacionesSAC@bbva.com. Telephone: +34 900 812 679. Web: www.bbva.es. For claims related to the sale or advice of this Product by an entity other than BBVA, please contact the entity which sold you or advised you about the Product.

7. Other relevant information

For further information about the functioning and risks of this Product, contact the entity which advises you or which is going to sell the Product to you. Prospectus registered with the Central Bank of Ireland. The Product will be issued under the most recent version of the Prospectus of the Issuer, which is available on the website of BBVA (https://shareholdersandinvestors.bbva.com/debt-investors/programas/structured-medium-term-note/). The Client should also check the issue terms of the Product. According to the Prospectus, the Product is governed by English law and the Client submits to the jurisdiction of the English courts.
