

## Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

## Product

Product name	Autocallable Worst-of Bonus Note Linked to a Basket of Ordinary Shares
Product identifiers	ISIN: XS3126383556   Valor: 144133090
Name of PRIIP manufacturer	Banco Bilbao Vizcaya Argentaria, S.A. ("BBVA"), acts as the manufacturer, while BBVA Global Markets B.V. is the issuer of the Product (the "Issuer") and assumes all the payment obligations towards the Client.
Contact Data	Web: www.bbva.es
For more information call	+34 900 108 637
Date of production of the KID	22/09/2025

You are about to purchase a product that is not simple and may be difficult to understand.

## 1. What is this product?

### Type

English law governed equity-linked notes / Return depends on the performance of the underlyings / No capital protection against market risk

### Term

The product has a fixed term and will be due on 29 September 2027, subject to an early redemption.

### Objectives

(Terms that appear in bold in this section are described in more detail in the table(s) below.)

The product is designed to provide a return in the form of (1) conditional interest payments and (2) a cash payment on termination of the product. The timing and amount of these payments will depend on the performance of the underlyings. If, at maturity, the final reference price of the worst performing underlying has fallen below 65.00% of its initial reference price, the product may return less than the product notional amount or even zero.

**Early termination following an autocall:** The product will terminate prior to the maturity date if, on any autocall observation date, the reference price of the worst performing underlying is at or above the relevant autocall barrier price. On any such early termination, you will on the immediately following autocall payment date receive, in addition to any final interest payment, a cash payment equal to the autocall payment of USD 1,000. No interest payments will be made on any date after such autocall payment date. The relevant dates and autocall barrier prices are shown in the table(s) below.

Autocall observation dates	Autocall barrier prices	Autocall payment dates
22 December 2025	100.00%*	30 December 2025
23 March 2026	97.00%*	30 March 2026
22 June 2026	94.00%*	29 June 2026
22 September 2026	91.00%*	29 September 2026
22 December 2026	88.00%*	30 December 2026
22 March 2027	85.00%*	29 March 2027
22 June 2027	82.00%*	29 June 2027

\* of the initial reference price of the relevant underlying.

**Interest:** If the product has not terminated early, on each interest payment date you will receive an interest payment of USD 20 together with any previously unpaid interest payments if the reference price of the worst performing underlying is at or above its interest barrier price on the immediately preceding interest observation date. If this condition is not met, you will receive no interest payment on such interest payment date. The relevant dates are shown in the table(s) below.

Interest observation dates	Interest payment dates
22 December 2025	30 December 2025
23 March 2026	30 March 2026
22 June 2026	29 June 2026
22 September 2026	29 September 2026
22 December 2026	30 December 2026
22 March 2027	29 March 2027
22 June 2027	29 June 2027
22 September 2027	Maturity date

**Termination on the maturity date:** If the product has not terminated early, on the maturity date you will receive:

- if the final reference price of the worst performing underlying is at or above 79.00% of its initial reference price, a cash payment equal to USD 1,000;
- if the final reference price of the worst performing underlying is at or above 65.00% of its initial reference price and below 79.00% of its initial reference price, a cash payment equal to USD 1,000; or
- if the final reference price of the worst performing underlying is below 65.00% of its initial reference price, a cash payment directly linked to the performance of the worst performing underlying. The cash payment will equal (i) the product notional amount multiplied by (ii) (A) the final reference price of the worst performing underlying divided by (B) its initial reference price. However if a knock-out event has occurred, you will receive USD 1,000.

Under the product terms, certain dates specified above and below will be adjusted if the respective date is either not a business day or not a trading day (as applicable). Any adjustments may affect the return, if any, you receive.

The product terms also provide that if certain exceptional events occur (1) adjustments may be made to the product and/or (2) the issuer may terminate the product early. These events are specified in the product terms and principally relate to the underlyings, the product and the issuer. The return (if any) you receive on such early termination is likely to be different from the scenarios described above and may be less than the amount you invested.

When purchasing this product during its lifetime, the purchase price may include accrued interest on a pro rata basis.

You do not have any entitlement to a dividend from any of the underlyings and you have no right to any further entitlement resulting from any such underlying (e.g., voting rights).

<b>Underlyings</b>	Ordinary shares of Starbucks Corp (SBUX; ISIN: US8552441094; Bloomberg: SBUX UW Equity; RIC: SBUX.OQ), Walt Disney Co (DIS; ISIN: US2546871060; Bloomberg: DIS UN Equity; RIC: DIS.N) and Salesforce Inc (CRM; ISIN: US79466L3024; Bloomberg: CRM UN Equity; RIC: CRM.N)	<b>Knock-out barrier price</b>	110.00% of the initial reference price
<b>Underlying market</b>	Equity	<b>Reference price</b>	The closing price of an underlying as per the relevant reference source
<b>Product notional amount</b>	USD 1,000	<b>Reference sources</b>	<ul style="list-style-type: none"> <li>• SBUX: NASDAQ - All Markets</li> <li>• DIS: New York Stock Exchange, Inc.</li> <li>• CRM: New York Stock Exchange, Inc.</li> </ul>
<b>Issue price</b>	100.00% of the product notional amount	<b>Final reference price</b>	The reference price on the final valuation date
<b>Product currency</b>	U.S. Dollar (USD)	<b>Initial valuation date</b>	22 September 2025
<b>Underlying currencies</b>	<ul style="list-style-type: none"> <li>• SBUX: USD</li> <li>• DIS: USD</li> <li>• CRM: USD</li> </ul>	<b>Final valuation date</b>	22 September 2027
<b>Issue date</b>	29 September 2025	<b>Maturity date / term</b>	29 September 2027
<b>Initial reference price</b>	The reference price on the initial valuation date	<b>Interest barrier price</b>	70.00% of the initial reference price
<b>Knock-out event</b>	A knock-out event occurs if the final reference price of any underlying is at or above its knock-out barrier price	<b>Worst performing underlying</b>	The underlying for which the result of dividing the final reference price by the initial reference price is the lowest amount (i.e., closer to 0)

## Intended retail investor

The product is intended to be offered to retail investors who fulfil all of the criteria below:

1. they have the ability to make an informed investment decision through sufficient knowledge and understanding of the product and its specific risks and rewards, either independently or through professional advice, and they may have experience of investing in and/or holding a number of similar products providing a similar market exposure;
2. they seek income and/or capital growth, expect the movement in the underlyings to perform in a way that generates a positive return. They have a short investment horizon and understand that the product may terminate early;
3. they are able to bear a total loss of their initial investment, consistent with the redemption profile of the product at maturity (market risk);
4. they accept the risk that the issuer could fail to pay or perform its obligations under the product irrespective of the redemption profile of the product (credit risk);
5. they are willing to accept a level of risk of 6 out of 7 to achieve potential returns, which reflects the second highest risk (as shown in the summary risk indicator below which takes into account both market risk and credit risk).

## 2. What are the risks and what could I get in return?

### Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 6 out of 7, which is the second-highest risk class. This rates the potential losses from future performance at a high level, and poor market conditions are very unlikely to impact our capacity to pay you.

**To the extent the currency of the country in which you purchase this product or your account currency differs from the product currency, please be aware of currency risk. You will receive payments in a different currency so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.**

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

**What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.**

**The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.**

<b>Recommended holding period:</b>	<b>Until the product is called or matures</b>		
	This may be different in each scenario and is indicated in the table		
<b>Example investment:</b>	USD 10,000		
<b>Scenarios</b>	<i>If you exit after 1 year</i>	<i>If you exit at call or maturity</i>	
<b>Minimum</b>	There is no minimum guaranteed return. You could lose some or all of your investment.		
<b>Stress (product ends after 2 years)</b>	<b>What you might get back after costs</b>	USD 3,452	USD 2,059
<b>Unfavourable (product ends after 2 years)</b>	<b>Average return each year</b>	-65.48%	-54.63%
<b>Moderate (product ends after 6 months)</b>	<b>What you might get back after costs</b>	USD 6,562	USD 4,772
<b>Favourable (product ends after 1 year and 9 months)</b>	<b>Average return each year</b>	-34.38%	-30.92%
	<b>Percentage return (not annualised)</b>		USD 10,400
			4.00%
	<b>What you might get back after costs</b>	USD 10,439	USD 11,400
	<b>Average return each year</b>	4.39%	7.77%

## Performance scenarios

The stress scenario shows what you might get back in extreme market circumstances. The favorable, moderate and unfavorable scenarios have been calculated using 10,000 simulations based on the underlying asset's past performance and represent the 90th, 50th and 10th percentile outcomes, respectively.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. Payments made to a client during the life of a product requires BBVA to make certain assumptions. This is for the purpose of undertaking scenario analysis and the calculation of product profitability as shown in the table. BBVA has decided not to capitalize these payments.

### 3. What happens if BBVA Global Markets B.V. is unable to pay out?

Banco Bilbao Vizcaya Argentaria, S.A. guarantees the payment obligations that the Issuer assumes in the Product, in its same terms. The Product is not covered by the Credit Institutions Deposit Guarantee Scheme or any other guarantee scheme. In the event that BBVA as guarantor could not pay, you would face a financial loss. In the event of the resolution of the Guarantor of such financial instrument (applicable process when the Guarantor is insolvent or it is expected that it will become insolvent in the near future and due to public interest and financial stability it is necessary to avoid its insolvency), such product could be converted into shares or its Nominal Amount and, as a result, you could incur losses on your investment.

### 4. What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

#### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different investment periods.

The duration of this product is uncertain as it may terminate at different times depending on how the market evolves. The amounts shown here consider two different scenarios (early call and maturity). In case you decide to exit before the product ends, exit costs may apply in addition to the amounts shown here.

We have assumed:

- USD 10,000 is invested
- a performance of the product that is consistent with each holding period shown.

	<i>If the product is called at the first possible date, on 30 December 2025</i>	<i>If the product reaches maturity</i>
<b>Total costs</b>	USD 641	USD 641
<b>Annual cost impact*</b>	7.0%	3.5% each year

\*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at maturity your average return per year is projected to be 6.4% before costs and 3.0% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

#### Composition of costs

	<b>One-off costs upon entry or exit</b>	<b>If you exit after 1 year</b>
<b>Entry costs</b>	6.4% of the amount you pay when entering this investment. These costs are already included in the price you pay.	USD 641
<b>Exit costs</b>	This product does not incur any exit fees if held until maturity. The exit fee in case of an early exit is defined in the section "How long should I hold it and can I take money out early?"	USD 150
<b>Ongoing costs taken each year</b>		
<b>Management fees and other administrative or operating costs</b>	0.0% of your investment amount per year. This is an estimate of the actual costs.	USD 0
<b>Transaction costs</b>	0.0% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	USD 0

### 5. How long should I hold it and can I take money out early?

#### Recommended holding period: 2 years

This Product will mature on 29 September 2027. This Product doesn't allow the Client to cancel their investment before 29 September 2027. However, under normal market conditions, BBVA may facilitate to the Client the price at which BBVA is able to buy the Product. Such a price will be calculated subtracting (i) from the fair value of the Product calculated by BBVA in accordance to the market variables and methodologies commonly used in market (ii) an estimated cost of 1.5% over the Nominal Amount. This anticipated sale may generate a financial loss to the Client.

### 6. How can I complain?

Customer Service. P.O. Box 1598. 28080 Madrid. e-mail: reclamacionesSAC@bbva.com. Telephone: +34 900 812 679. Web: www.bbva.es. For claims related to the sale or advice of this Product by an entity other than BBVA, please contact the entity which sold you or advised you about the Product.

### 7. Other relevant information

For further information about the functioning and risks of this Product, contact the entity which advises you or which is going to sell the Product to you. Prospectus registered with the Central Bank of Ireland. The Product will be issued under the most recent version of the Prospectus of the Issuer, which is available on the website of BBVA (<https://shareholdersandinvestors.bbva.com/debt-investors/programas/structured-medium-term-note/>). The Client should also check the issue terms of the Product. According to the Prospectus, the Product is governed by English law and the Client submits to the jurisdiction of the English courts.
