This PRIIP is authorised in Ireland.
Date of production of the KID	18/12/2025

You are about to purchase a product that is not simple and may be difficult to understand.

1. What is this product?

Type

English law governed equity-linked notes / Return depends on the performance of the underlying / No capital protection against market risk

Term

The product has a fixed term and will be due on 2 January 2031, subject to an early redemption.

Objectives

(Terms that appear in bold in this section are described in more detail in the table(s) below.)

The product is designed to provide a return in the form of (1) conditional interest payments and (2) either a cash payment or the delivery of the underlying on termination of the product. What you may receive, and when, will depend on the performance of the underlying. If, at maturity, the final reference price of the underlying has fallen below the barrier price, the product may return shares of a value that is less than the product notional amount or even zero.

Early termination following an autocall: The product will terminate prior to the maturity date if, on any autocall observation date, the reference price is at or above the autocall barrier price. On any such early termination, you will on the immediately following autocall payment date receive, in addition to any final interest payment, a cash payment equal to the autocall payment of USD 1,000. No interest payments will be made on any date after such autocall payment date. The relevant dates are shown in the table(s) below.

Autocall observation dates	Autocall payment dates
17 December 2027	3 January 2028
17 March 2028	31 March 2028
20 June 2028	5 July 2028
18 September 2028	2 October 2028
18 December 2028	3 January 2029
19 March 2029	2 April 2029
18 June 2029	3 July 2029
17 September 2029	1 October 2029
17 December 2029	2 January 2030
18 March 2030	1 April 2030
17 June 2030	2 July 2030
17 September 2030	1 October 2030

Interest: If the product has not terminated early, on each interest payment date you will receive an interest payment of USD 31 together with any previously unpaid interest payments if the reference price is at or above the interest barrier price on the immediately preceding interest observation date. If this condition is not met, you will receive no interest payment on such interest payment date. The relevant dates are shown in the table(s) below.

Interest observation dates	Interest payment dates
17 March 2026	31 March 2026
17 June 2026	2 July 2026
17 September 2026	1 October 2026
17 December 2026	4 January 2027
17 March 2027	31 March 2027
17 June 2027	1 July 2027
17 September 2027	1 October 2027
17 December 2027	3 January 2028
17 March 2028	31 March 2028
20 June 2028	5 July 2028
18 September 2028	2 October 2028
18 December 2028	3 January 2029
19 March 2029	2 April 2029
18 June 2029	3 July 2029
17 September 2029	1 October 2029
17 December 2029	2 January 2030
18 March 2030	1 April 2030
17 June 2030	2 July 2030
17 September 2030	1 October 2030
17 December 2030	Maturity date

Termination on the maturity date: If the product has not terminated early, on the maturity date you will receive:

1. if the **final reference price** is at or above the **barrier price**, a cash payment equal to USD 1,000; or
2. if the **final reference price** is below the **barrier price**, physical delivery of 5 shares of the **underlying** and the cash equivalent of 0.85001 such shares. The value of such shares will generally be less than the amount you invested.

Under the product terms, certain dates specified above and below will be adjusted if the respective date is either not a business day or not a trading day (as applicable). Any adjustments may affect the return, if any, you receive.

The product terms also provide that if certain exceptional events occur (1) adjustments may be made to the product and/or (2) the issuer may terminate the product early. These events are specified in the product terms and principally relate to the **underlying**, the product and the issuer. The return (if any) you receive on such early termination is likely to be different from the scenarios described above and may be less than the amount you invested.

When purchasing this product during its lifetime, the purchase price may include accrued interest on a pro rata basis.

You do not have any entitlement to a dividend from the **underlying** and you have no right to any further entitlement resulting from the **underlying** (e.g., voting rights).

Underlying	Ordinary shares of NVIDIA Corp (ISIN: US67066G1040; Bloomberg: NVDA UW Equity; RIC: NVDA.OQ)	Barrier price	USD 102.56
Underlying market	Equity	Reference price	The closing price of the underlying as per the reference source
Product notional amount	USD 1,000	Reference source	NASDAQ - All Markets
Issue price	100.00% of the product notional amount	Final reference price	The reference price on the final valuation date
Product currency	U.S. Dollar (USD)	Initial valuation date	17 December 2025
Underlying currency	USD	Final valuation date	17 December 2030
Issue date	31 December 2025	Maturity date / term	2 January 2031
Initial reference price	USD 170.94	Autocall barrier price	USD 170.94
Strike price	USD 170.94	Interest barrier price	USD 102.56

Intended retail investor

The product is intended to be offered to retail investors who fulfil all of the criteria below:

1. they have the ability to make an informed investment decision through sufficient knowledge and understanding of the product and its specific risks and rewards, either independently or through professional advice, and they may have experience of investing in and/or holding a number of similar products providing a similar market exposure;
2. they seek income, expect the movement in the underlying to perform in a way that generates a positive return. They have a long investment horizon and understand that the product may terminate early;
3. they are able to bear a total loss of their initial investment, consistent with the redemption profile of the product at maturity (market risk);
4. they accept the risk that the issuer could fail to pay or perform its obligations under the product irrespective of the redemption profile of the product (credit risk);
5. they are willing to accept a level of risk of 6 out of 7 to achieve potential returns, which reflects the second highest risk (as shown in the summary risk indicator below which takes into account both market risk and credit risk).

2. What are the risks and what could I get in return?

Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 6 out of 7, which is the second-highest risk class. This rates the potential losses from future performance at a high level, and poor market conditions are very unlikely to impact our capacity to pay you.

To the extent the currency of the country in which you purchase this product or your account currency differs from the product currency, please be aware of currency risk. You will receive payments in a different currency so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

In the event of physical delivery of the **underlying** on termination of the product, you may incur a loss if the value of the **underlying** decreases between termination of the product and the date on which the **underlying** is credited to your securities account.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

Recommended holding period:	Until the product is called or matures		
	This may be different in each scenario and is indicated in the table		
Example investment:	USD 10,000		
Scenarios		<i>If you exit after 1 year</i>	<i>If you exit at call or maturity</i>
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress (product ends after 5 years)	What you might get back after costs Average return each year	USD 1,307 -86.93%	USD 819 -39.34%
Unfavourable (product ends after 5 years)	What you might get back after costs Average return each year	USD 6,140 -38.60%	USD 2,648 -23.31%
Moderate (product ends after 2 years)	What you might get back after costs Average return each year	USD 9,810 -1.90%	USD 12,480 11.66%
Favourable	What you might get back after costs	USD 11,575	USD 14,340

Performance scenarios

(product ends after 3 years Average return each year and 6 months)

15.75%

10.82%

The stress scenario shows what you might get back in extreme market circumstances. The favorable, moderate and unfavorable scenarios have been calculated using 10,000 simulations based on the underlying asset's past performance and represent the 90th, 50th and 10th percentile outcomes, respectively.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. Payments made to a client during the life of a product requires BBVA to make certain assumptions. This is for the purpose of undertaking scenario analysis and the calculation of product profitability as shown in the table. BBVA has decided not to capitalize these payments.

3. What happens if BBVA Global Markets B.V. is unable to pay out?

Banco Bilbao Vizcaya Argentaria, S.A. guarantees the payment obligations that the Issuer assumes in the Product, in its same terms. The Product is not covered by the Credit Institutions Deposit Guarantee Scheme or any other guarantee scheme. In the event that BBVA as guarantor could not pay, you would face a financial loss. In the event of the resolution of the Guarantor of such financial instrument (applicable process when the Guarantor is insolvent or it is expected that it will become insolvent in the near future and due to public interest and financial stability it is necessary to avoid its insolvency), such product could be converted into shares or its Nominal Amount and, as a result, you could incur losses on your investment.

4. What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different investment periods.

The duration of this product is uncertain as it may terminate at different times depending on how the market evolves. The amounts shown here consider two different scenarios (early call and maturity). In case you decide to exit before the product ends, exit costs may apply in addition to the amounts shown here.

We have assumed:

- USD 10,000 is invested
- a performance of the product that is consistent with each holding period shown.

	<i>If the product is called at the first possible date, on 3 January 2028</i>	<i>If the product reaches maturity</i>
Total costs	USD 203	USD 203
Annual cost impact*	1.1% each year	0.5% each year

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at maturity your average return per year is projected to be 10.6% before costs and 10.1% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

Composition of costs

	One-off costs upon entry or exit	If you exit after 1 year
Entry costs	2.0% of the amount you pay when entering this investment. These costs are already included in the price you pay.	USD 203
Exit costs	This product does not incur any exit fees if held until maturity. The exit fee in case of an early exit is defined in the section "How long should I hold it and can I take money out early?"	USD 150
Ongoing costs taken each year		
Management fees and other administrative or operating costs	0.0% of your investment amount per year. This is an estimate of the actual costs.	USD 0
Transaction costs	0.0% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	USD 0

5. How long should I hold it and can I take money out early?

Recommended holding period: 5 years

This Product will mature on 2 January 2031. This Product doesn't allow the Client to cancel their investment before 2 January 2031. However, under normal market conditions, BBVA may facilitate to the Client the price at which BBVA is able to buy the Product. Such a price will be calculated subtracting (i) from the fair value of the Product calculated by BBVA in accordance to the market variables and methodologies commonly used in market (ii) an estimated cost of 1.5% over the Nominal Amount. This anticipated sale may generate a financial loss to the Client.

6. How can I complain?

Customer Service. P.O. Box 1598. 28080 Madrid. e-mail: reclamacionesSAC@bbva.com. Telephone: +34 900 812 679. Web: www.bbva.es. For claims related to the sale or advice of this Product by an entity other than BBVA, please contact the entity which sold you or advised you about the Product.

7. Other relevant information

For further information about the functioning and risks of this Product, contact the entity which advises you or which is going to sell the Product to you. Prospectus registered with the Central Bank of Ireland. The Product will be issued under the most recent version of the Prospectus of the Issuer, which is available on the website of BBVA (<https://shareholdersandinvestors.bbva.com/debt-investors/programas/structured-medium-term-note/>). The Client should also check the issue terms of the Product. According to the Prospectus, the Product is governed by English law and the Client submits to the jurisdiction of the English courts.
