This PRIIP is authorised in Ireland.
Date of production of the KID	16/01/2026

You are about to purchase a product that is not simple and may be difficult to understand.

1. What is this product?

Type	English law governed equity-linked notes / Return depends on the performance of the underlying / No capital protection against market risk
Term	The product has a fixed term and will be due on 5 February 2029.
Objectives (Terms that appear in bold in this section are described in more detail in the table(s) below.)	<p>The product is designed to provide a return in the form of a cash payment on the maturity date. The amount of this payment will depend on the performance of the underlying. If, at maturity, the final reference price of the underlying has fallen below the initial reference price, the product may return less than the product notional amount or even zero.</p> <p>On termination of the product on the maturity date you will receive a cash payment directly linked to the performance of the underlying. The cash payment will equal (i) the product notional amount multiplied by (ii) (A) the final reference price divided by (B) the initial reference price.</p> <p>Under the product terms, certain dates specified below will be adjusted if the respective date is either not a business day or not a trading day (as applicable). Any adjustments may affect the return, if any, you receive.</p> <p>The product terms also provide that if certain exceptional events occur (1) adjustments may be made to the product and/or (2) the issuer may terminate the product early. These events are specified in the product terms and principally relate to the underlying, the product and the issuer. The return (if any) you receive on such early termination is likely to be different from the scenarios described above and may be less than the amount you invested.</p> <p>You do not have any entitlement to a dividend from the underlying and you have no right to any further entitlement resulting from the underlying (e.g., voting rights).</p>

Underlying	Ordinary shares of NVIDIA Corp (ISIN: US67066G1040; Bloomberg: NVDA UW Equity; RIC: NVDA.OQ)	Initial reference price	The reference price on the initial valuation date
Underlying market	Equity	Reference price	The closing price of the underlying as per the reference source
Product notional amount	EUR 1,000	Reference source	NASDAQ - All Markets
Issue price	100.00% of the product notional amount	Final reference price	The reference price on the final valuation date
Product currency	Euro (EUR)	Initial valuation date	20 January 2026
Underlying currency	U.S. Dollar (USD)	Final valuation date	29 January 2029
Issue date	27 January 2026	Maturity date / term	5 February 2029

Intended retail investor

The product is intended to be offered to retail investors who fulfil all of the criteria below:

- they have the ability to make an informed investment decision through sufficient knowledge and understanding of the product and its specific risks and rewards, either independently or through professional advice, and they may have experience of investing in and/or holding a number of similar products providing a similar market exposure;
- they seek capital growth, expect the movement in the underlying to perform in a way that generates a positive return. They have a medium investment horizon;
- they are able to bear a total loss of their initial investment, consistent with the redemption profile of the product at maturity (market risk);
- they accept the risk that the issuer could fail to pay or perform its obligations under the product irrespective of the redemption profile of the product (credit risk);

5. they are willing to accept a level of risk of 6 out of 7 to achieve potential returns, which reflects the second highest risk (as shown in the summary risk indicator below which takes into account both market risk and credit risk).

2. What are the risks and what could I get in return?

Risk indicator

Lower risk

Higher risk

 The risk indicator assumes you keep the product until 5 February 2029. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to cash in early. You may have to pay significant extra costs to cash in early.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 6 out of 7, which is the second-highest risk class. This rates the potential losses from future performance at a high level, and poor market conditions are very unlikely to impact our capacity to pay you.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

Recommended holding period:		3 years	
Example investment:		EUR 10,000	
Scenarios		If you exit after 1 year	If you exit after 3 years (Recommended holding period)
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	EUR 779	EUR 650
	Average return each year	-92.21%	-59.53%
Unfavourable	What you might get back after costs	EUR 4,815	EUR 13,565*
	Average return each year	-51.85%	10.62%
Moderate	What you might get back after costs	EUR 18,700	EUR 37,976**
	Average return each year	87.00%	55.51%
Favourable	What you might get back after costs	EUR 37,126	EUR 153,703***
	Average return each year	271.26%	146.98%

* This type of scenario occurred for an investment between 29 November 2024 and 30 December 2025.

** This type of scenario occurred for an investment between 30 April 2020 and 28 April 2023.

*** This type of scenario occurred for an investment between 30 September 2022 and 30 September 2025.

The stress scenario shows what you might get back in extreme market circumstances. The favorable, moderate and unfavorable scenarios have been calculated using 10,000 simulations based on the underlying asset's past performance and represent the 90th, 50th and 10th percentile outcomes, respectively.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. Payments made to a client during the life of a product requires BBVA to make certain assumptions. This is for the purpose of undertaking scenario analysis and the calculation of product profitability as shown in the table. BBVA has decided not to capitalize these payments.

3. What happens if BBVA Global Markets B.V. is unable to pay out?

Banco Bilbao Vizcaya Argentaria, S.A. guarantees the payment obligations that the Issuer assumes in the Product, in its same terms. The Product is not covered by the Credit Institutions Deposit Guarantee Scheme or any other guarantee scheme. In the event that BBVA as guarantor could not pay, you would face a financial loss. In the event of the resolution of the Guarantor of such financial instrument (applicable process when the Guarantor is insolvent or it is expected that it will become insolvent in the near future and due to public interest and financial stability it is necessary to avoid its insolvency), such product could be converted into shares or its Nominal Amount and, as a result, you could incur losses on your investment.

4. What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10,000 is invested

	<i>If you exit after 1 year</i>	<i>If you exit after 3 years</i>
Total costs	EUR 150	EUR 0
Annual cost impact*	1.5%	0.0% each year

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 55.5% before costs and 55.5% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	0.0% of the amount you pay when entering this investment. These costs are already included in the price you pay.	EUR 0
Exit costs	This product does not incur any exit fees if held until maturity. The exit fee in case of an early exit is defined in the section "How long should I hold it and can I take money out early?"	EUR 150
Ongoing costs taken each year		
Management fees and other administrative or operating costs	0.0% of your investment amount per year. This is an estimate of the actual costs.	EUR 0
Transaction costs	0.0% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	EUR 0

5. How long should I hold it and can I take money out early?

Recommended holding period: 3 years

This Product will mature on 5 February 2029. This Product doesn't allow the Client to cancel their investment before 5 February 2029. However, under normal market conditions, BBVA may facilitate to the Client the price at which BBVA is able to buy the Product. Such a price will be calculated subtracting (i) from the fair value of the Product calculated by BBVA in accordance to the market variables and methodologies commonly used in market (ii) an estimated cost of 1.5% over the Nominal Amount. This anticipated sale may generate a financial loss to the Client.

6. How can I complain?

Customer Service. P.O. Box 1598. 28080 Madrid. e-mail: reclamacionesSAC@bbva.com. Telephone: +34 900 812 679. Web: www.bbva.es. For claims related to the sale or advice of this Product by an entity other than BBVA, please contact the entity which sold you or advised you about the Product.

7. Other relevant information

For further information about the functioning and risks of this Product, contact the entity which advises you or which is going to sell the Product to you. Prospectus registered with the Central Bank of Ireland. The Product will be issued under the most recent version of the Prospectus of the Issuer, which is available on the website of BBVA (<https://shareholdersandinvestors.bbva.com/debt-investors/programas/structured-medium-term-note/>). The Client should also check the issue terms of the Product. According to the Prospectus, the Product is governed by English law and the Client submits to the jurisdiction of the English courts.
