Comisión Nacional del Mercado de Valores (CNMV) is responsible for supervising BBVA in relation to this Key Information Document.

Date of production of the KID: 09/03/2024

You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type

FX Forward. This is an OTC derivative financial instrument, i.e. it is not traded on an exchange and, as such, it is arranged bilaterally between the client and BBVA. The client and BBVA agree to exchange two amounts denominated in two different currencies, on a specific date in the future (the "Settlement date").

Term

Maturity Date is 03/08/2025.

Objectives

On the Settlement date, the client will pay BBVA an agreed amount of NEW ZEALAND DOLL (NZD). In exchange, on the same settlement date, BBVA will pay the client an agreed amount of AUSTRALIAN DOLL (AUD). The relationship between both amounts is the forward rate in terms of units of NEW ZEALAND DOLL (NZD) for each AUSTRALIAN DOLL (AUD).

The client seeks to benefit from future increases in the value of AUSTRALIAN DOLL (AUD) vs. NEW ZEALAND DOLL (NZD) in exchange for waiving the return from possible decreases in its value.

In this document, the following have been considered: the forward rate is NEW ZEALAND DOLL (NZD) 1.091 for each AUSTRALIAN DOLL (AUD), the amount paid by the client is NEW ZEALAND DOLL (NZD) 10,911.684 and the amount paid by BBVA is AUSTRALIAN DOLL (AUD) 10,000.

The Settlement date matches the maturity date of the product and will occur between 6 and 12 months after the contract agreement date.

Intended retail investor

This product category is mainly designed for investors who:

- Investors with average knowledge of this financial product or with some experience in investing in this or similar products.
- Investors who are willing to accept losses not limited to the payment of a premium
- are able to hold the product until the 08/03/2025
- Investors whose aim is to achieve return and/or hedging linked to the progress of exchange rates

What are the risks and what could I get in return?

Summary Risk Indicator

The risk indicator assumes you keep the product until the date 8 March 2025.
The actual risk can vary significantly if you cash in at an early stage and you may incur in significant losses. You may not be able to cash in early.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 7 out of 7, which is 7 the highest risk class.

This rates the potential losses from future performance at a very high level, and poor market conditions are very unlikely to impact our capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

In some circumstances you may be required to make payments to pay for losses. The total loss you may incur may be significant.

This product does not include any protection from future market performance so you could lose incur significant losses

If (we) (are) not able to pay you what is owed, you could incur significant losses.

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. **The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.**

Recommended Holding Period: 1 year

Example Nominal Amount: AUD 15,000

Scenarios		If you exit after recommended holding period
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment or have to make further payments to cover losses.	
Stress	What you might get back or pay after costs	AUD -26,020
	Return/lossAverage over nominal amount each year	-26.02%
Unfavourable	What you might get back or pay after costs	AUD -7,130
	Return/lossAverage over nominal amount each year	-7.13%
Moderate	What you might get back or pay after costs	AUD -870
	Return/lossAverage over nominal amount each year	-0.87%
Favourable	What you might get back or pay after costs	AUD 4,920
	Return/lossAverage over nominal amount each year	4.92%

The stress scenario shows what you might get back or pay in extreme market circumstances. The favorable, moderate and unfavorable scenarios have been calculated using 10,000 simulations based on the underlying asset's past performance and represent the 90th, 50th and 10th percentile outcomes, respectively. The figures shown include all the costs of the product itself. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What happens if BBVA is unable to pay out?

The customer would suffer a financial loss. In addition, this product is not covered by the Deposit Guarantee Fund for Financial Institutions or any other guarantee system or guarantor.

In the event of the resolution of BBVA (the process that would apply if BBVA were unviable or if it were foreseeable that it would become unviable in the near future and for reasons of public interest and financial stability it is necessary to avoid it going bankrupt), this product could be converted into shares or the payment obligations undertaken by BBVA to the customer could be reduced and the customer could therefore suffer losses.

What are the costs?

Costs Over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- 15,000 AUD is invested

	If you exit after 1 year
Total costs	AUD 40
Annual Cost impact (*)	0.4% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be -0.5% before costs and -0.9% after costs.

This illustrates costs in relation to the notional value of the PRIIP.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	This is the fee associated with acquiring this Product. This fee is already reflected in the price.	400 AUD
Exit costs	This product does not incur any exit fees if held until maturity. The exit fee in case of an early exit is defined in the section "How long should I hold it and can I take money out early?"	0 AUD
Ongoing costs		
Management fees and other administrative or operating costs	This fee does not apply for this product.	0 AUD
Transaction costs	This fee does not apply for this product.	0 AUD

How long should I hold it and can I take money out early?

Recommended Holding Period: 1 year

The Product doesn't allow early termination or refund unless BBVA and the Client reach an agreement regarding the date and the early termination amount. In such case, the early termination amount at which BBVA is willing to terminate will be calculated in accordance with the "Market Value" criteria, which is, the result of terminating at present value the future rights and obligations expected for the Client and BBVA in accordance with the factors and valuation methodologies commonly employed in the market.

The previous result may imply a loss or benefit for the Client. Additionally, early termination will imply an implicit cost of 0% over the notional amount to terminate which (i) will increase the amount the Client must pay if said amount is negative or (ii) will reduce the amount the Client must receive if the Market Value is a positive amount.

If both parts agree to terminate the Product by means of the early exchange of the FX currencies previously agreed, the exchange rate will be

determined by means of the market exchange rate adjusted by the Market Value of the Product and an implicit cost of 0% over the notional amount to terminate which will deteriorate the exchange rate for the client.

How can I complain?

Customer Service. P.O. Box 1598. 28080 Madrid. e-mail: reclamacionesSAC@bbva.com. Telephone: 900 812 679. Web: <https://www.bbva.es/sistema/meta/calidad.jsp> For claims related to the sale of or advice about this Product by an entity different from BBVA, contact the entity which sold you or advised you about the Product.
