Publication Date: 26/11/2022

You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type

Non-deliverable FX Forward. The Product is a derivative financial instrument whereby the Client and BBVA undertake to ensure that, in a future date ("Settlement Date"), one party shall pay the other party a specified amount of money ("Settlement Amount") in the Settlement Currency. The Party who must make the payment and the payable amount shall depend on a previously agreed Exchange Rate ("Forward Exchange Rate"), as detailed below:

Objectives

With this Product, the Client is entitled to receive the Settlement Amount if the Exchange Rate is higher than the arranged Forward Exchange Rate and shall be obliged to its payment in the case of the Exchange Rate is lower than the Forward Exchange Rate. If the Exchange Rate is equal to the Forward Exchange Rate, no payment shall be made on the Settlement Date

The Settlement Amount that one party is due to pay the other party on the Settlement Date shall be calculated as follows:

Settlement Amount = Notional Amount of the Settlement Currency x (Forward Exchange Rate – Exchange Rate) / Exchange Rate

- If the Settlement Amount is positive The Client shall pay BBVA the Settlement Amount.
- If the Settlement Amount is a negative BBVA shall pay the Client the absolute value of the Settlement Amount.

Purchaser Reference Currency: BBVA

Seller Reference Currency: Client

Settlement Currency: CAD

Reference Currency: PEN

Settlement Date: between 3 and 6 months after the contract agreement

Maturity Date: between 3 and 6 months after the contract agreement

Notional Amount of the Settlement Currency: Resulting from dividing the Notional Amount of the Reference Currency by the Forward Exchange Rate

Notional Amount of the Reference Currency: As agreed by the parties

Currency Pair: CAD/PEN (Canadian Dollar/Sol). This means the amount of PEN for each CAD

Exchange Rate: The purchase price of the Currency Pair on the Maturity Date

Forward Exchange Rate: 2.938

Intended retail investor

This product category is mainly designed for investors who:

- Investors with average knowledge of this financial product or with some experience in investing in this or similar products.
- Investors who are willing to accept losses not limited to the payment of a premium
- are able to hold the product until the 25/05/2023
- Investors whose aim is to achieve return and/or hedging linked to the progress of exchange rates

What are the risks and what could I get in return?

Summary Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 7 out of 7, which is 7 the highest risk class. This rates the potential losses from future performance at

The risk indicator assumes you keep the product for 5 months and 28 days; until the date 25 May 2023. The actual risk can vary significantly if you cash in at an early stage and you may incur significant losses. You may not be able to cash in early. You may have to pay a significant extra cost to cash in early.

a very high level, and poor market conditions are very unlikely to impact our capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

In some circumstances you may be required to make payments to pay for losses. The total loss you may incur may be significant.

This product does not include any protection from future market performance so you could lose incur significant losses

If (we) (are) not able to pay you what is owed, you could incur significant losses.

Performance Scenarios

Market developments in the future cannot be accurately predicted. The scenarios shown are only an indication of some of the possible outcomes based on recent returns. Actual returns could be lower.

Nominal Amount CAD 15,000		
Scenarios		5 months and 28 days final maturity
Stress scenario	What you might get back or pay after costs	CAD -7,158
	Return/loss over nominal amount;	-47.72%
Unfavourable scenario	What you might get back or pay after costs	CAD -1,266
	Return/loss over nominal amount;	-8.44%
Moderate scenario	What you might get back or pay after costs	CAD -48
	Return/loss over nominal amount;	-0.32%
Favourable scenario	What you might get back or pay after costs	CAD 1,102
	Return/loss over nominal amount;	7.35%

This table shows the money you could get back or pay over the next 5 months and 28 days, under different scenarios, assuming a Nominal Value of 15,000 CAD. The scenarios shown illustrate how your Nominal Amount could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment Nominal Amount varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the Nominal Amount/product.

The stress scenario shows what you might get back or pay in extreme market circumstances, and it does not take into account the situation where we are not able to pay you. The figures shown include all the costs of the product itself, and includes the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What happens if BBVA is unable to pay out?

The customer would suffer a financial loss. In addition, this product is not covered by the Deposit Guarantee Fund for Financial Institutions or any other guarantee system or guarantor.

In the event of the resolution of BBVA (the process that would apply if BBVA were unviable or if it were foreseeable that it would become unviable in the near future and for reasons of public interest and financial stability it is necessary to avoid it going bankrupt), this product could be converted into shares or the payment obligations undertaken by BBVA to the customer could be reduced and the customer could therefore suffer losses.

What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the performance of the product. The total costs take into account one-off, ongoing and incidental costs

The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential early exit penalties. The figures assume a Nominal Value of 15,000 CAD. The figures are estimates and may change in the future.

Costs Over Time

Nominal Amount CAD 15,000	
Scenarios	If you cash in at the end of the recommended holding period 6 months
Total costs	CAD 97.82
Impact on return (RIY)	0.65%

Composition of costs

The table below shows:

- the impact of the different types of costs on the performance of the product at the end of the recommended holding period;
- the meaning of the different cost categories.

This table shows the impact on return

One-off costs	Entry costs	0.65%	The impact of the costs you pay when entering your investment. The impact of the costs already included in the price. This includes the costs of distribution of your product.
	Exit costs	0.00%	The impact of the costs of exiting your investment when it matures
Ongoing costs	Portfolio transaction costs	0.00%	The impact of the costs of us buying and selling underlying investments for the product.
	Other ongoing costs	0.00%	The impact of the costs that we take for managing your investments and the costs presented in section II.

How long should I hold it and can I take money out early? Recommended Holding Period: 5 months and 28 days

The Product doesn't allow early termination or refund unless BBVA and the Client reach an agreement regarding the date and the early termination amount. In such case, the early termination amount at which BBVA is willing to terminate will be calculated in accordance with the "Market Value" criteria, which is, the result of terminating at present value the future rights and obligations expected for the Client and BBVA in accordance with the factors and valuation methodologies commonly employed in the market.

The previous result may imply a loss or benefit for the Client. Additionally, early termination will imply an implicit cost of 0.65% over the notional amount to terminate which (i) will increase the amount the Client must pay if said amount is negative or (ii) will reduce the amount the Client must receive if the Market Value is a positive amount.

How can I complain?

Customer Service. P.O. Box 1598. 28080 Madrid. e-mail: reclamacionesSAC@bbva.com. Telephone: 900 812 679. Web: <https://www.bbva.es/sistema/meta/calidad.jsp> For claims related to the sale of or advice about this Product by an entity different from BBVA, contact the entity which sold you or advised you about the Product.

Other relevant information

The figures included in this document (costs, performance scenarios..) correspond to the Recommended Holding Period and this is shorter than one year. For this reason, these figures are only comparable to the figures of other products that have the same Recommended Holding Period. For complete and detailed information about the functioning and risks of this Product. Please check carefully the pre-contractual information document available at BBVA offices.

The prices and levels are included so that the Client can better understand the Product, but they are estimated and may vary when acquiring the Product.
